

Global Business Risk Index for International Schools

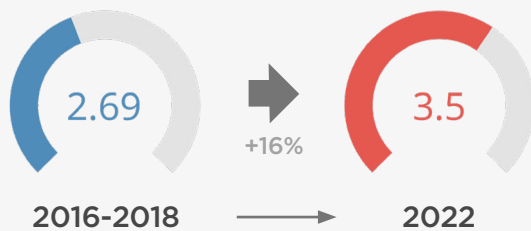

Information is the best tool to reduce risk.

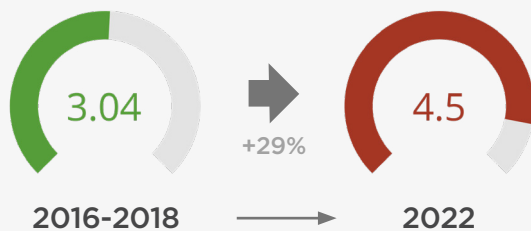

Clements Worldwide specializes in risk mitigation for international schools, working to protect organizations and staff. We have developed a global risk survey, specifically designed to identify key challenges facing the international school community. This live database compiles critical data which identifies patterns that help international schools prepare by implementing effective risk management strategies and by securing the right insurance coverage.

Between 2016 to 2018, we collected risk surveys from more than 160 schools and today we are comparing that information against newly collected 2022 data. This helps us identify areas of concern, top losses, and areas in which organizations are most and least prepared. Some key findings are listed below.

DISEASE / PANDEMIC CONCERN

EMPLOYEE MEDICAL CONCERN

CYBER

12%
IN 2018

39%
IN 2022

SCHOOLS EXPECTING
TO EXPERIENCE
A CYBER INCIDENT

How can you help

Please consider contributing to this database. The survey takes about 10 minutes to complete and allows us to share helpful insights that could make a world of difference for you and your colleagues by providing a clear picture of current and future threats to your school.

By completing the survey, you will get first access to this data when available.
