

Strategic Thinking and Planning

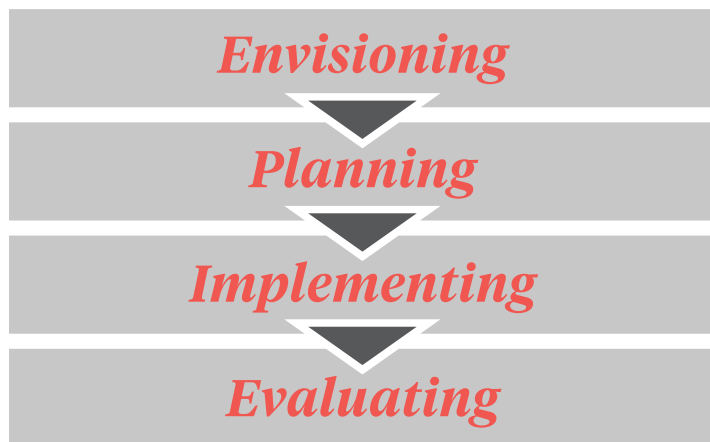

Inspire, engage, and activate your team for real change.

Define the future you want for your school. With guidance from our experts, you'll motivate your team and stakeholders, and create a culture of continuous improvement to achieve goals.

Transformational improvement planning

Is your improvement plan getting the results you want? To move forward, you need a strategically designed plan that establishes concrete, actionable steps to impact student learning and professional practice—or simply to improve what you're already doing. Cognia's research-based planning process helps school leaders create a vision, a culture of school improvement, and a theory of action to ensure effective implementation. The process results in a strategy map and implementation plan that are clear and concise for all stakeholders to understand and adopt. The map and plan guide your initiatives, embedding quality practices and engaging your team to drive tangible progress.

Four guided phases support setting and achieving meaningful goals, with thoughtful measurement and adjustment.

Funding

Elementary and Secondary School Emergency Relief (ESSER) funds are authorized for use on Cognia Improvement Solutions and the resources and services on the Cognia Improvement Platform available through membership. **The Cognia expert for your region can advise you on how to use federal funding.**

“Cognia started at the district level, working with us through our vision of how we wanted to move forward. As we added new activities to our strategic map, the whole process was very transparent in terms of which school was doing what. We also appreciated the coaching that Cognia provided, including the training sessions and workshops.”

—Pam Stroklund
Career & Technical Education Director
Minot, ND
