A Modern School Management Software designed to eliminate rigorous work

educare is a cost-efficient platform which helps ease the hassles of school operations by automating processes to **improve quality of education, drive down running costs and increase revenue through increased enrollment**

**We Are On a Mission
To Help You Solve Your Most Critical Challenges
in Education To Drive Student Success**

As a leading school management software, **educare** offers powerful, flexible features which easily bring Teachers, Students, Parents and Schools together

Why educare?

Research has shown that schools in Africa, especially those privately owned, encounter many pressing challenges in their quest to improve on quality of education.

Some of these challenges include:

Poor Parental involvement

With reference to **Public Gender Reports and Survey of January 2012**, **60%** of parents wish to get more involved in their child's educational process.

Cost of Running Schools

58% of private schools in Africa survive on loans from banks and other financial institutions owing to their inability to meet up with the ever-increasing cost demands of running schools.

Time consumption in result computation

96 hours (Average) spent processing academic reports per Teacher every term

Inadequate Technology infrastructure

Our surveys show that deficiencies in technology infrastructure pose a great deal of challenge to school management and student learning process

We are your partner in progress —
working alongside you to enable success for your school
with innovative technologies and services

To support your goals, **educare delivers:**

Data Security

With an increase in the issue facing schools around data security, it's a question which schools all over the world should be asking.

We have employed very sophisticated approaches which ensure data safety and security for our partner schools.

A Connected Experience

In the classroom, in an office, or even a government agency, we provide a connected learning experience and support network.

educare works with you to create the seamless, intuitive and insightful experience learners need for success in an educational environment.

Data-Driven Insights

We provide accessible, relevant, and actionable insights and leverage data from all touch points to deliver information at every level.

Flexible Solutions

We created an ecosystem designed to fit the specific needs of our users through educare's open, scalable and integrated solutions.

Serving
K-12 Schools—
Globally

educare helps K-12 schools foster engaged communities and personalized learning paths which drive student success in the midst of rapid change.

K-12 Categories

- Early Years Foundation Schools (EYFS)/Nursery
- Junior/Primary Schools
- High/Secondary Schools

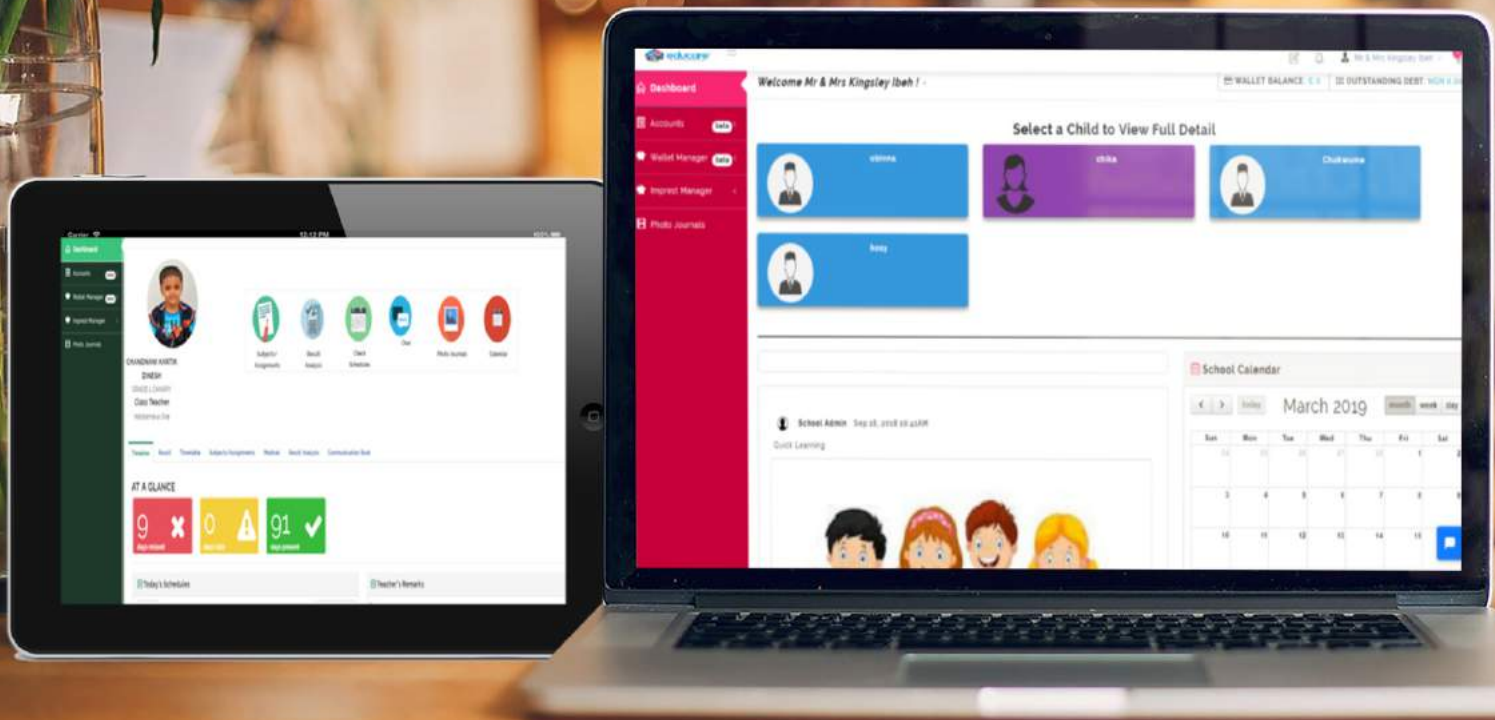

educare powers an all involving community enriched with limitless features engaging Students, Teachers, Parents with Schools

The educare platform is interfaced in four(4) different corridors for the enjoyment of our various users such as: the school Admin, the Parent, the teacher and the student. Each of these has its own special corridor packed with exclusive enablements. However, we have created four(4) different Dashboards to represent the above corridor according to the user.

educare FOR ADMIN

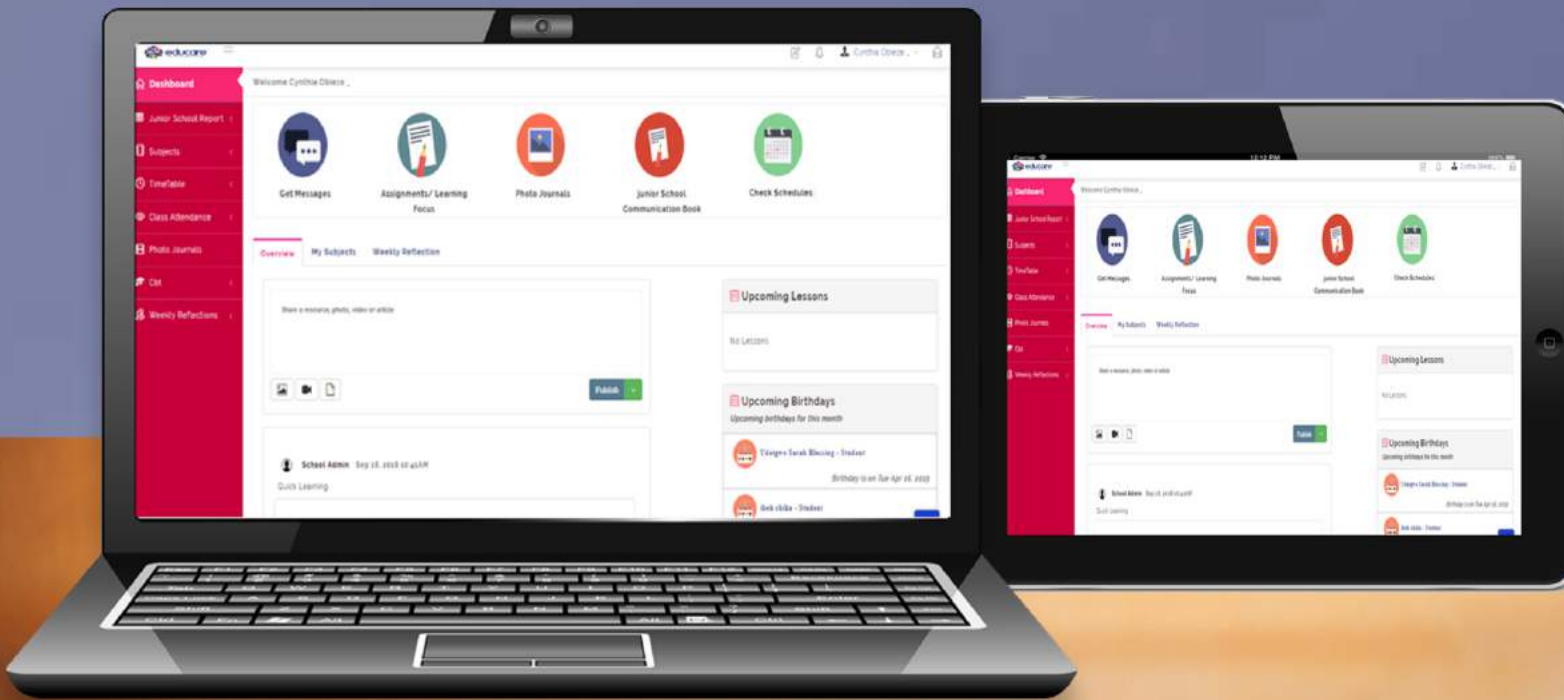

educare modern design and intuitive interface saves time and provides insight into student performance, attendance, Biographical Data, School Calendar, Class & School-wide View, Custom Roles, Directory, Discipline, Enrollment, Fees, Medical, Transcripts, and so much more.

educare FOR PARENTS

Poor parent communication/involvement has led to some parents not having enough information about how their child is doing in school.

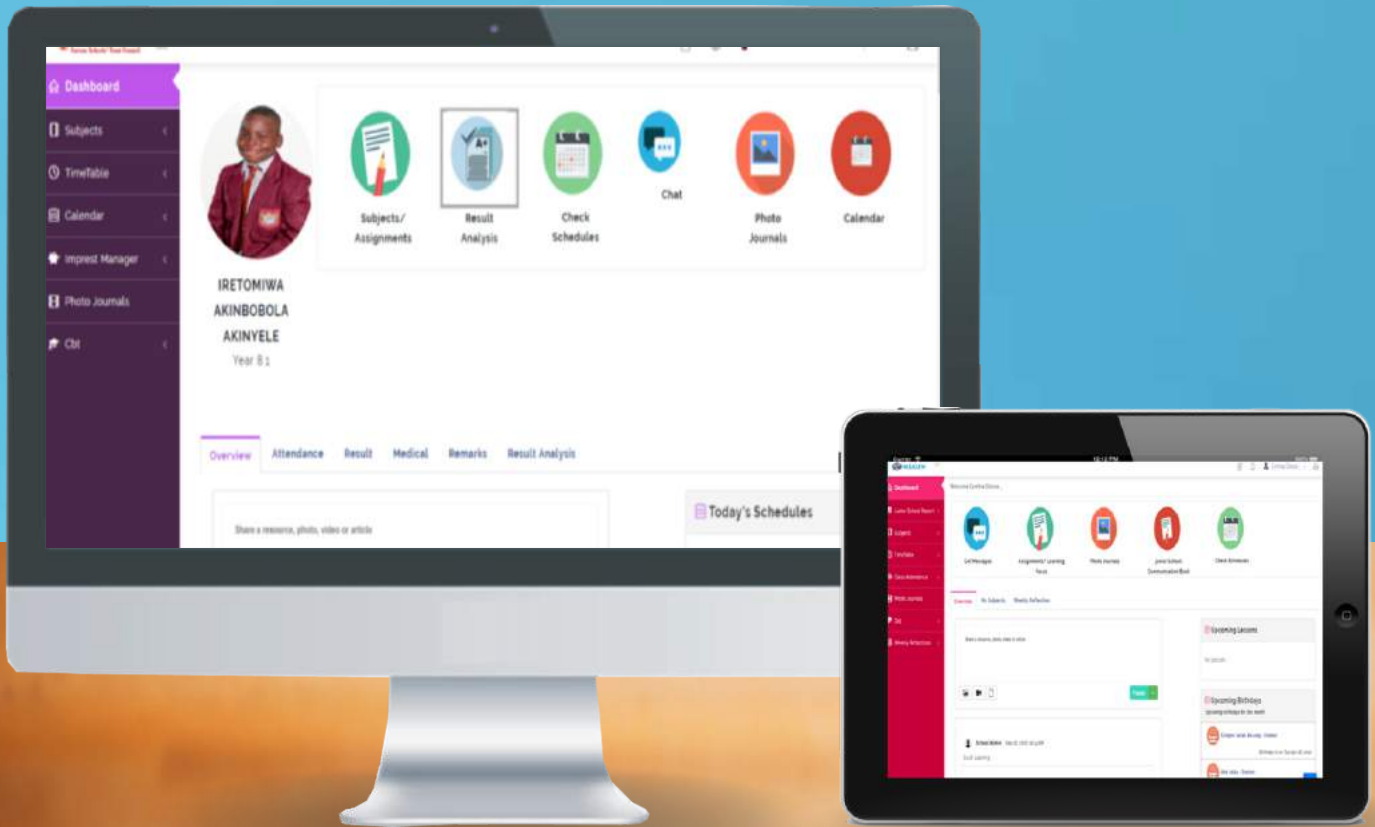

The educare Parent app allows schools to easily communicate with parents. Whether it's sharing information on attendance, homework or school reports, parents can stay on top of their child's progress, making it possible for parents to be part of their child's learning process.

educare FOR TEACHERS

educare smartly interfaces students and teachers via its platform that fosters easy communication and performance analysis.

Including Attendance, Biographical Data, Calendar, Class-wide View, Custom Roles and Rosters.

educare FOR STUDENTS

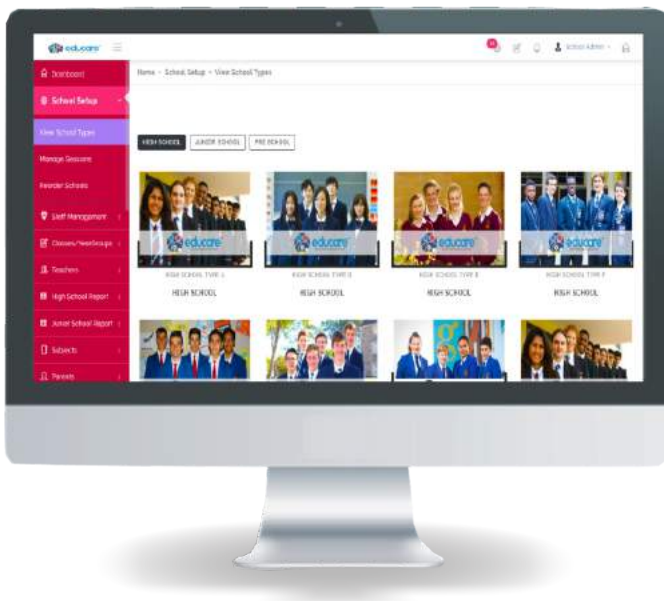

Encourages students to drive their own achievements by allowing them see how they are progressing towards their learning targets.

Students can directly access all the information (i.e. Timetable, homework etc.) they need outside of school from their phone, tablet or PC.

educare
Features

Reporting

educare enables schools create, customize, develop and distribute report cards, just the way they want it.

Early Years/ Nursery School

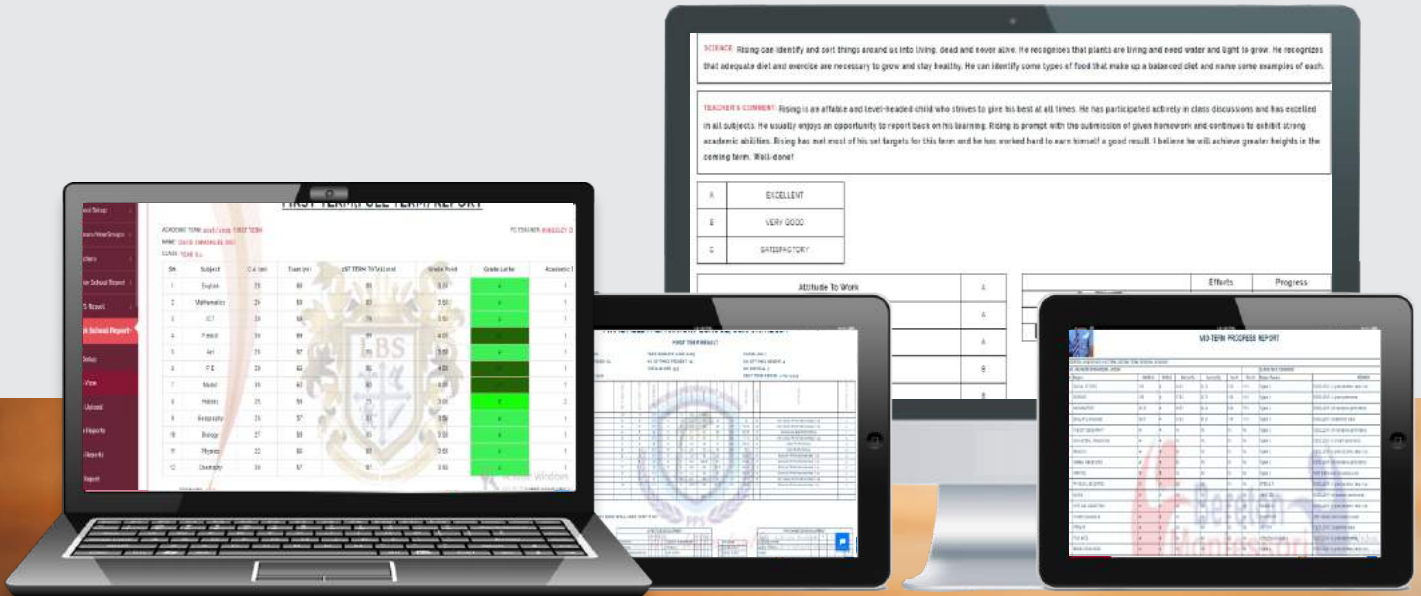

Early Years reporting has always been done manually because existing systems are not built to accommodate them. We understand that Early Year's reports have to do with words, shapes and on a few occasions numbers; with this, educare has been designed to accommodate the Early Years report and all the stress in the most automated/intuitive ways.

Reporting

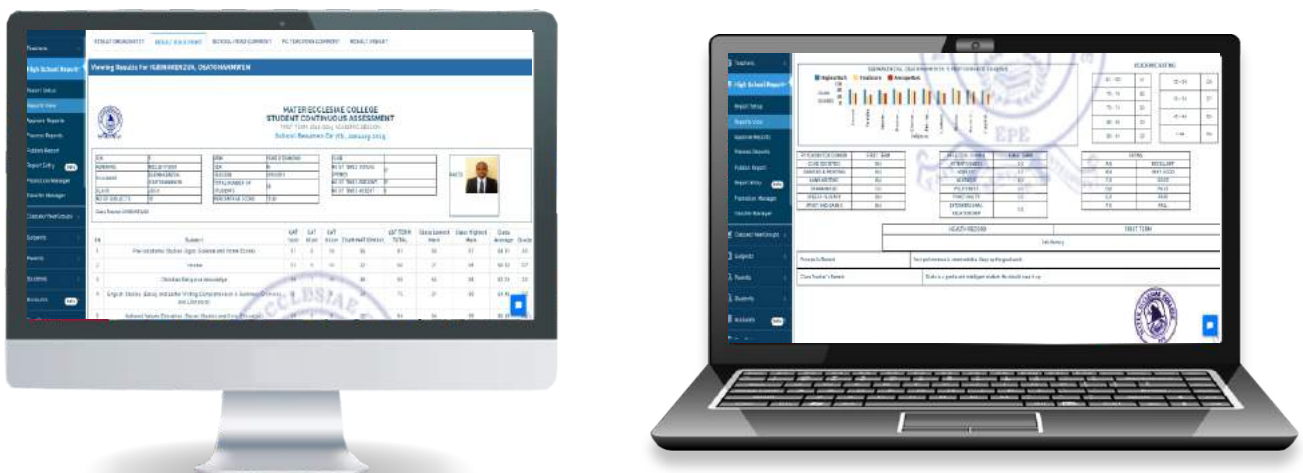

Junior/ High School

educare replicates your paper-based results sheets electronically, customizes your report cards according to what you want and pushes them to parents for view online and subsequent printing.

Report Bulk Printing

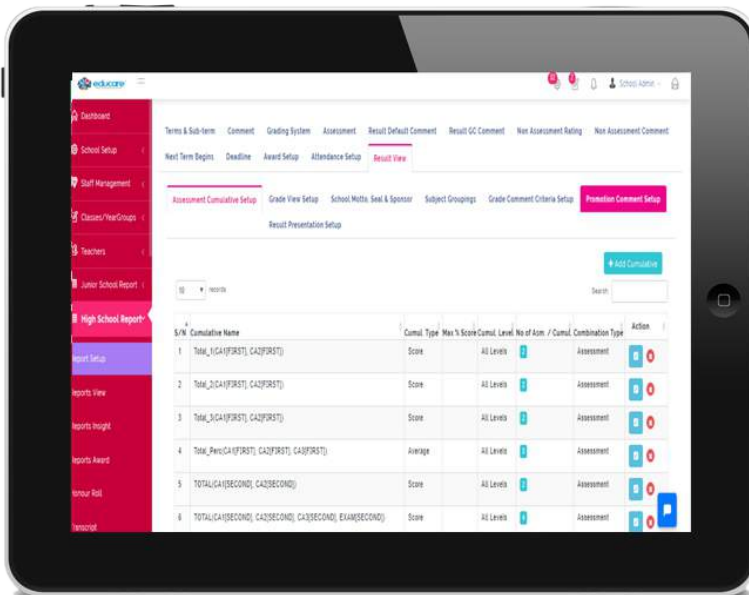

Send all readily approved reports of a given class to the printer with a click. This saves the time of individual, random printing and publishing

Reporting

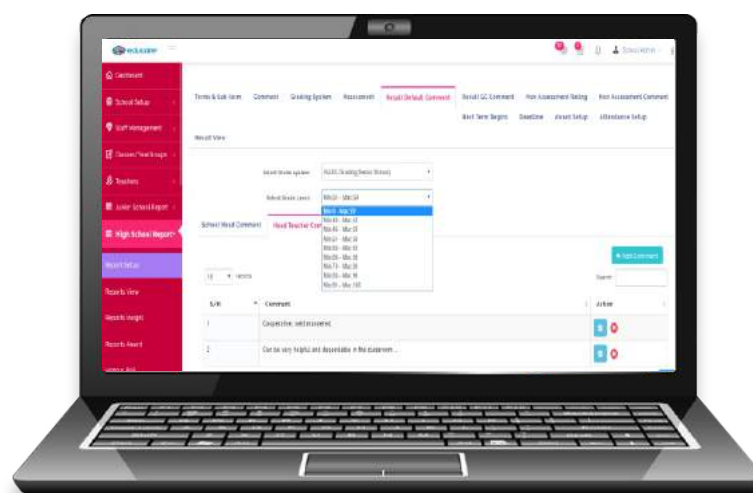

Wide View Report Set up

The school admin and teachers have the opportunity to get a full glimpse of the whole report setup at a glance. At this panel the admin gets to click and enter all required grading information for reports computation. Information like; Comments, Non-Assessment Rating, Attendance Setup, Grading System, Next Term Begins and so on, are provided accurately to ensure report fulfilment.

Automatic Comment System

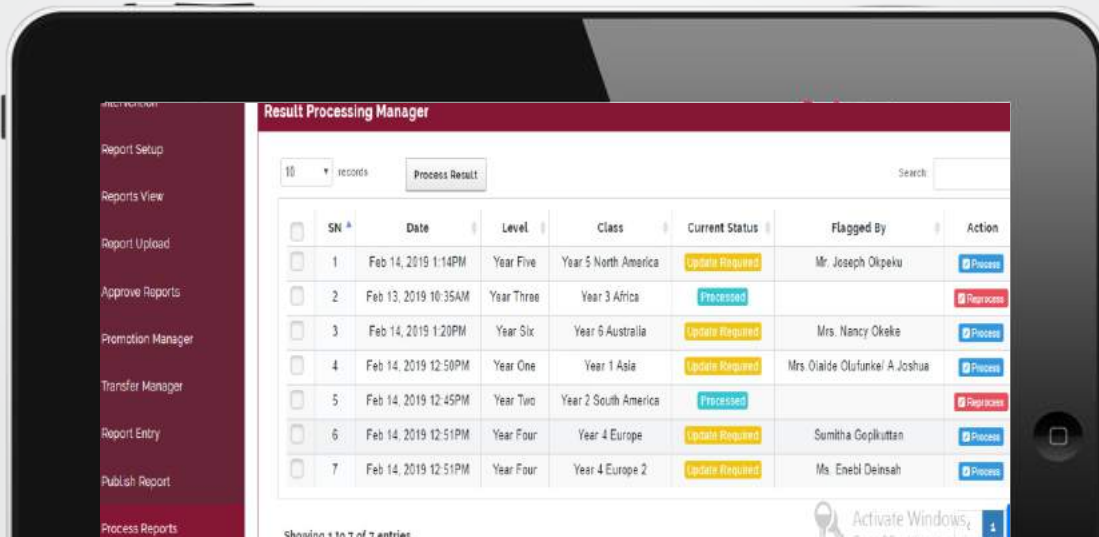

Our system sets a default setup where Teacher, Class teachers and subject teachers quickly select their respective comments for a given child's report owing to the student grade performance entry.

Reporting

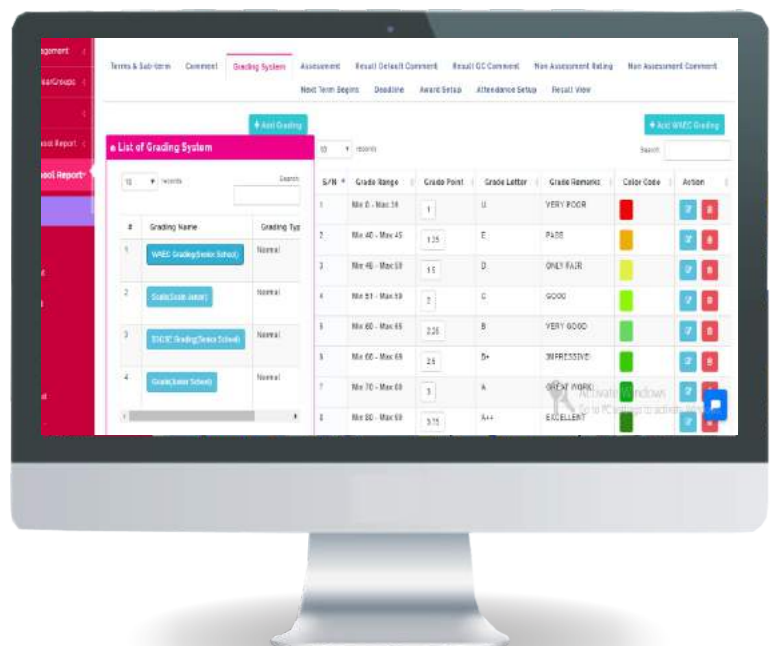

Report Processing

With the reports data submitted across classes, the admin gets to calculate the raw materials; ensuring that pieces of information go in their right places for final computation of reports into a viewable format. During report processing any error identified could easily be corrected.

Flexible Grade Articulation

Educare grading system has been made to be very easy and adjustable in the sense that the admin could easily modify the maximum and minimum grade levels anytime the school deems fit. This process is clear and does not require any rigorous means.

“

It's easy to find everything I need when adding assignments and grades for my students. I love that I can add comments with each assignment. It is easy to go between classes from one feature of educare to another.

I am also a parent, and I love how I can quickly see my child's grades, AND missing assignments on one page. This helps us keep up with what needs to be done.”

”

Kate Eboigbe

Curriculum Leader (Creative Art), Lekki British School Lekki, Lagos

“

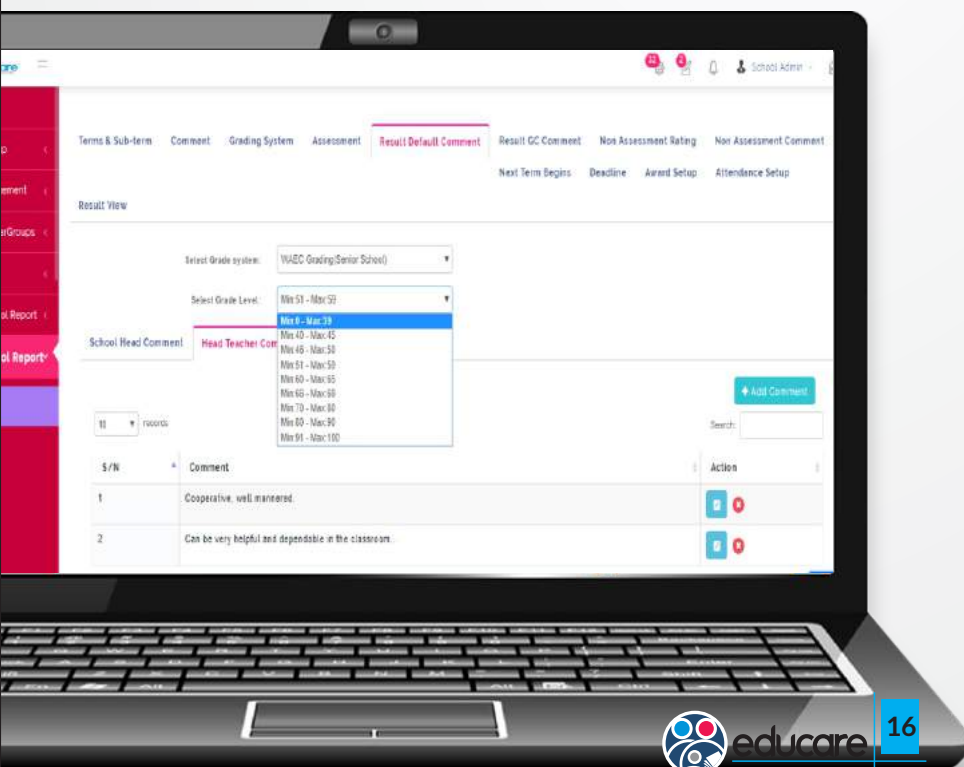

Almost termly we get introduced to new updates to the software. It continues simplifying work for us teachers.

It's easy to put anecdotal notes on student's accounts such that parents can see.”

”

Mrs. Gloria Eze

Principal, Rev. Ejindu Memorial Secondary School, Enugu.

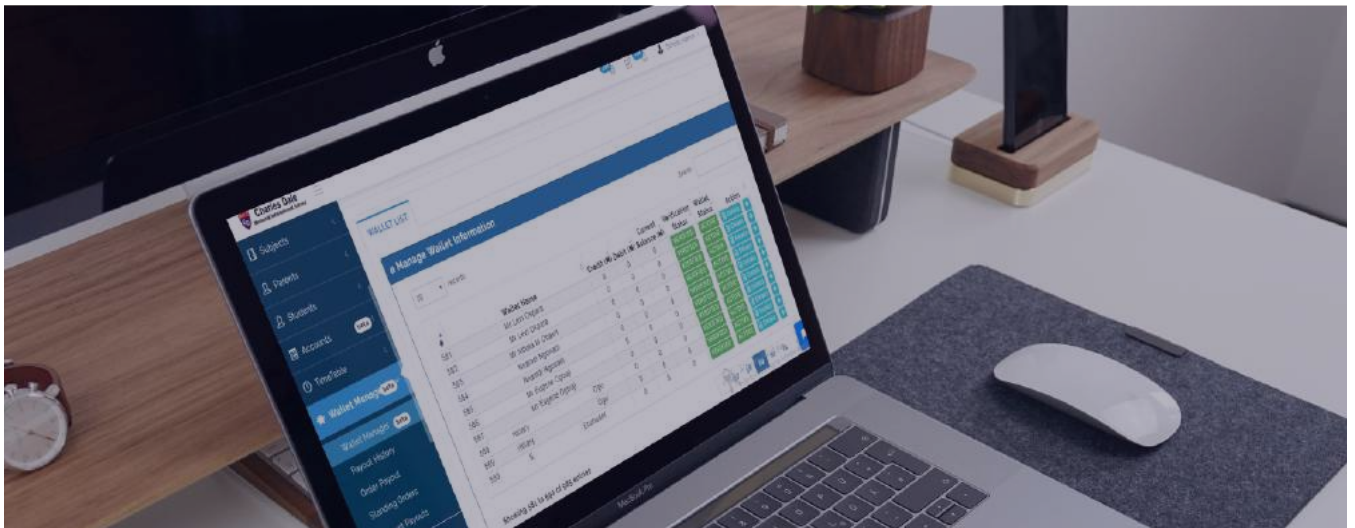

When it comes to keeping track of your school's fee income, you need to be sure you're using a secure and efficient system. educare incorporates all types of fee structures followed by different institutions worldwide.

educare Finance is our new school finance solution to streamline financial management across an academy or multi-academy trust, providing them with a complete and consolidated picture of their finances.

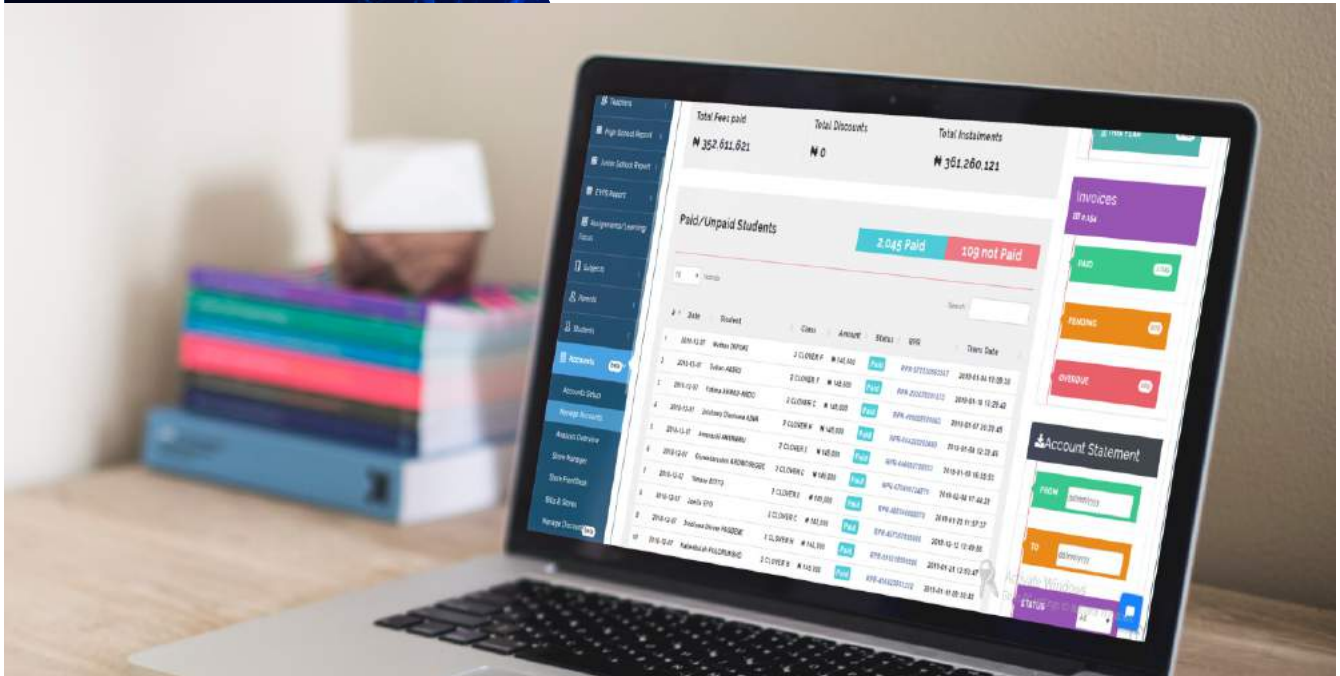

Wallet

This module enables Parents to make deposit for child/children Fees. Wallet serves as a saver for parents on our platform.

Report Processing

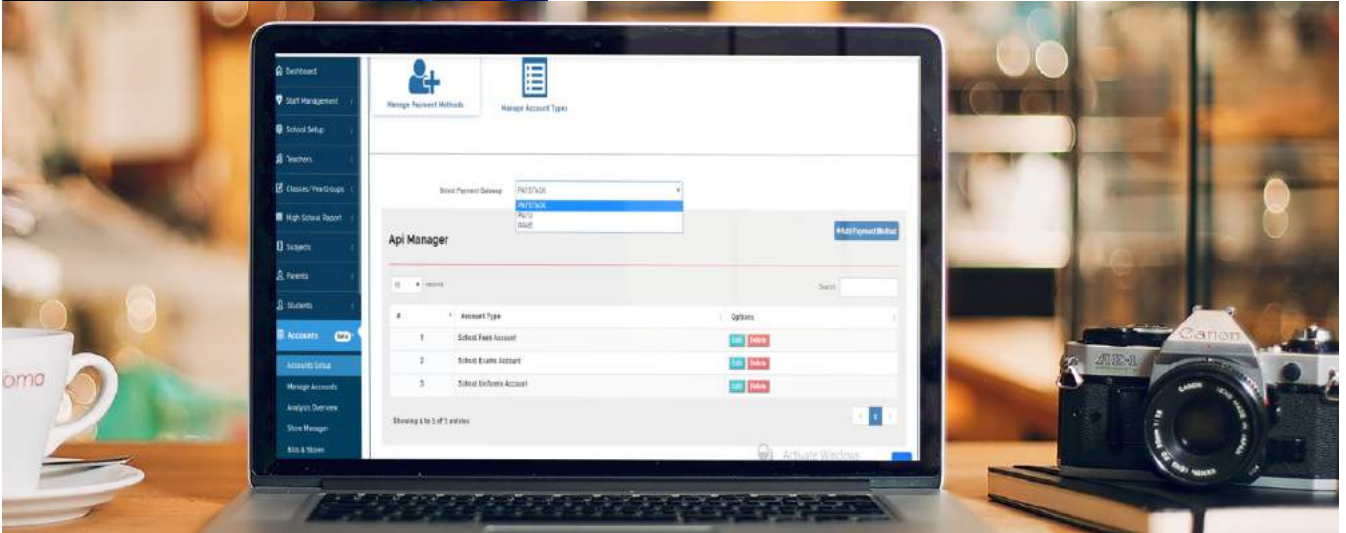

When it comes to keeping track of your school's fee income, you need to be sure you're using a secure and efficient system. educare Billing also has the flexibility to integrate with other accounting systems

- educare incorporates all types of fee structures followed by different institutions worldwide
- Fees setup can be done based on student category or for a complete course in a few clicks
- Fixed/Instant discounts can be provided along with late fees fine collection
- Academic fees can be collected along with transport and hostel fees in one go
- Fee defaulters report can be checked and students/parents can be reminded about the pending fees via SMS/email
- There are multiple reports on collected/pending fees and their receipts
- Fees refund/revert can be done by privileged employees based on the requirement
- Invoice report can be generated for scheduled fees
- Common transactions that are done in the institution can be recorded by creating custom categories
- Tally integration helps in export of financial transactions from educare. The sync can be done manually in bulk or as a live sync
- Fees can be collected online by integrating educare with options of Payment Gateways available
- Specific controlled access can be provided to users for access of Finance.

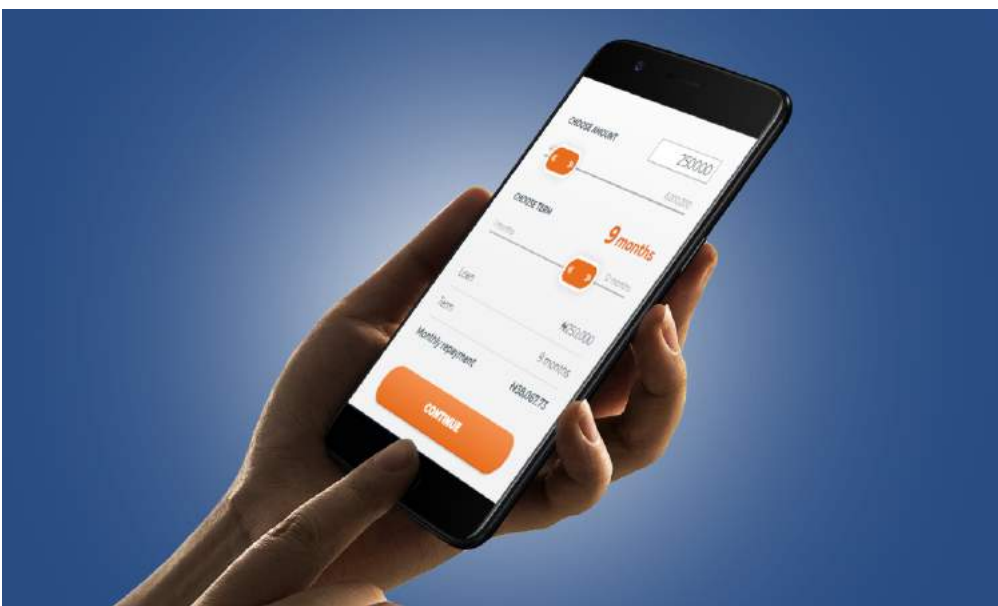

Payment Gateway Integration

educare has a fully functional payment gateway to enable your School accept online payment through credit cards. educare is integrated with Paystack, PayU & Inter-switch. This payment option can be enabled for Student Academic fees, Applicant registration, Funding of wallet, Hostel and Transport Fees.

Students and parents can check their fee details, pay fees online, and print the fee receipts—all from their mobile phones.

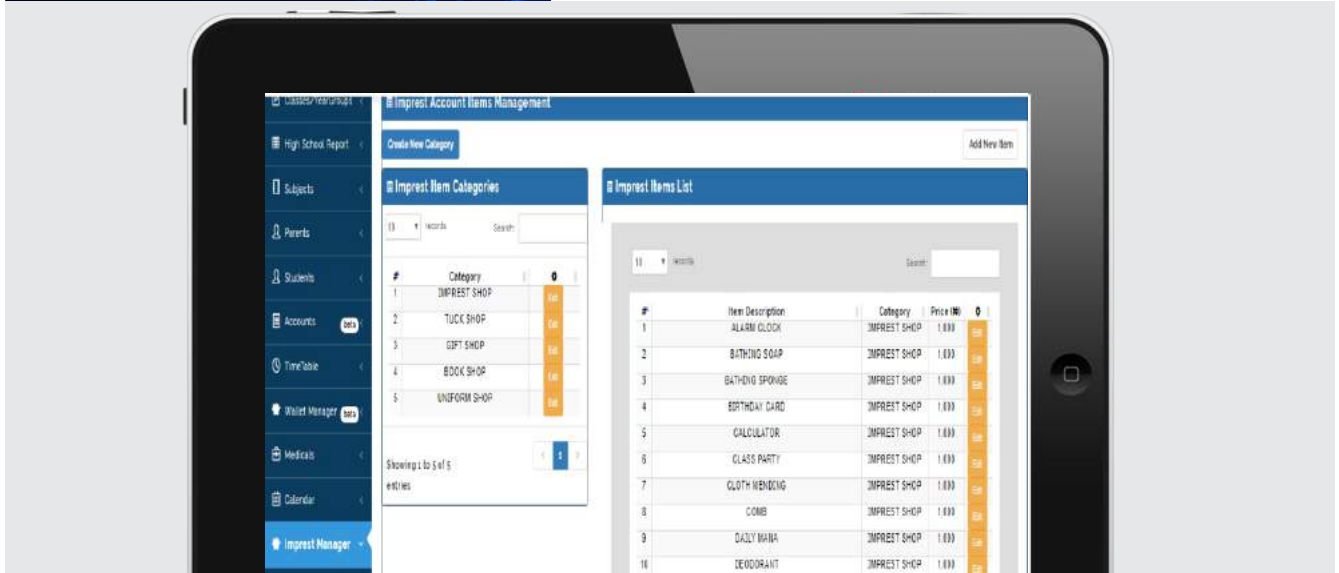

Loan

At educare, Parents get access to loans without collateral. The loans are disbursed directly to your wallet on educare platform.

Inventory/Tuck Shop

Inventory module adds lots of functionality in managing an official order or requisition for goods and purchasing items for the school. The Entire process is tracked and can be analysed in future for verification.

Store items can be managed and the employees can raise indents whenever items are required. Store manager can also add stores, store items, raise indents, raise purchase orders, etc

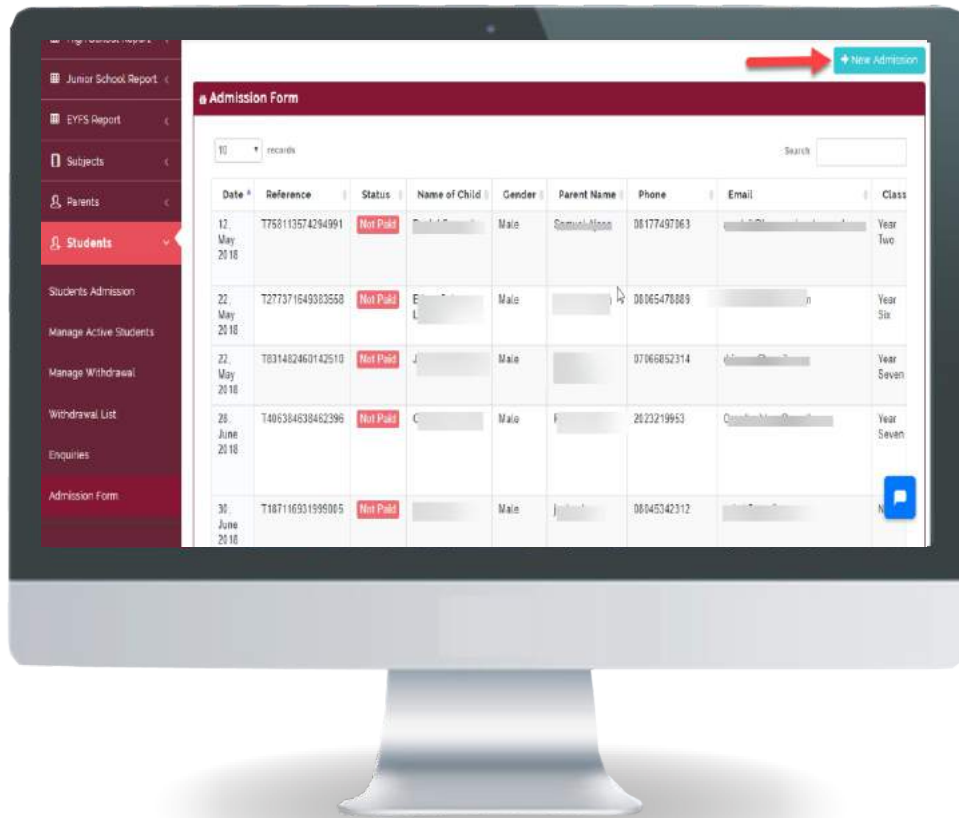

The educare reporting and accounting modules are especially exciting as they automate this otherwise full-time job with complete accuracy and self-explained templates. I highly recommend this system to any school administrator that pursues excellence.

Rev Fr. Emmanuel Ayeni
Administrator, St Gregory's College, Ikoyi, Lagos

Admission Management

Admissions are the life-blood of any independent or international school – keeping up the momentum of continuous interest, through enquiries and applications, is a key part of your success and strategic planning, both in the near and medium-term future.

With educare, school management can easily gauge whether your pupil/student recruitment numbers are on a par or exceeding those of the previous years. You can also use the Admissions management module to provide a comparison against the previous year.

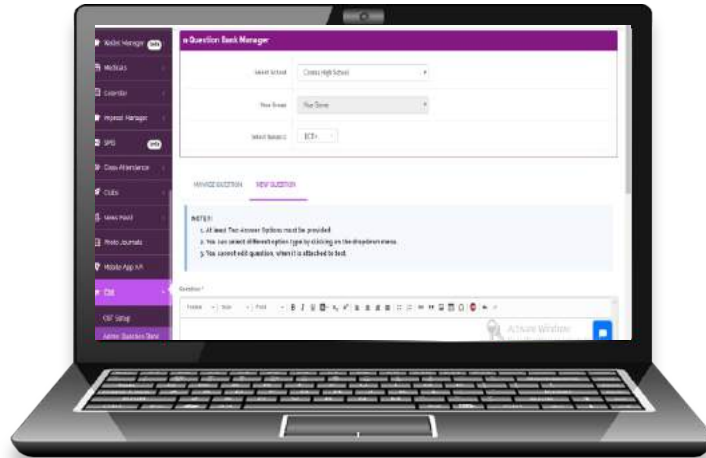

The educare Admission Progress Tracking enables user keep tab of the number of enquiries and of applications by status (Applied, Offered, Accepted, etc.). This view can then be expanded to show the figures per year group.

Admission Progress Tracking

Get every individual prospective student's admission progress followed through enquiry and purchase of the admission form to his/her taking the entrance exams (Pre-Entrance and Post Entrance). With our system, the candidate's extent of progress in the admission process is banked for accurate admission records of the year's new trials and in-takes.

Online Entrance Exams

educare is fully integrated with automation and digitalization of data uses. The hitherto Hand written entrance exams which forces prospective students to travel all the way to the school for the exam becomes obnoxious with the birth of educare. A Computer Based Testing (CBT) process is introduced to school to quicken both the entrance process and to make marking and grading of the candidates a quick and transparent one.

- First those who passed through the early stage of requirement get invited/selected for the CBT.
- Some schools make provisions for additional testing (Filtering Process) for successful candidates in the entrance exam. Where a post entrance exam is scheduled for them.
- For the post entrance exam, candidates can pick the forms on the school's admission module, fill it up and submit with the attached payment. The time for unnecessary population cluster at the school admission office is over. educare automates every admission process and makes it less cumbersome for the school's managements.

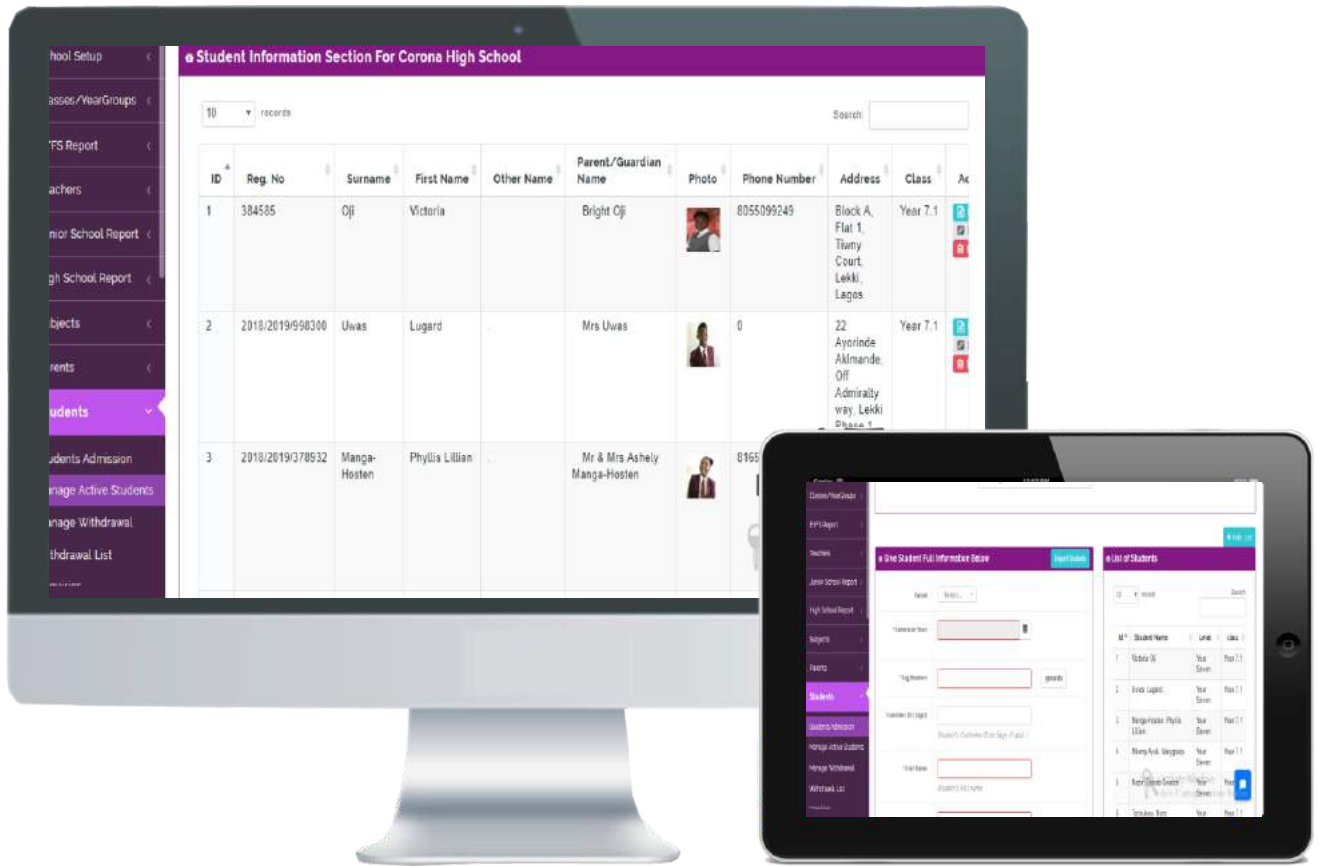

“Over the years, the physical rush we hitherto face during admission seasons has been subdued since we on-boarded educare. Inquiries, payments for forms including entrance are now all conducted online.

At Best, I can compare our admission progress across different sessions; because the system stores and displays all admission data: for both successful and unsuccessful applications, all in one dashboard.”

Mr Felix Salami

Principal, J.S Margaret High School, Aguda Lagos

Students Profiling

Educare uses a modern and intuitive approach to organize, store and display Students Records for both current students and Alumni

I like that I can look up any student in our school and see that student's schedule and current information.

These guys wowed me. I mean, all the information related to students and their parents all in one place.

Chinonyelum Peace Ani (Mrs.)

PC Teacher, Rev. Ejindu Memorial School, Enugu

Population Insight

At one glance, the educare Dashboard shows user's comprehensive population statistics of the entire school community. Additionally, the active (registered for the term) students are indicated.

At first visit to the schools Portal, even a visitor could tell everything concerning the statistical data of the school; ranging from the total number of students in the school to the gender distribution of males and female students with ratio specification. Again, the number of teachers in the school is equally captured with this module,

Gender Distribution

Get the accurate distribution of male students and their female counterparts. Our system provides a quick ratio of the male population to the female at a glance. Monitor any future changes in the statistics.

Class Distribution

For each academic year, the module displays the population statistics for every given class year; both EYFS and K12 Classes. The Distribution chart shows the class/ year group with the highest number of students all over the school.

- Within each class/ year group, the gender distribution is also observable.
- Each class/ year group has its unique colour identification which distinguishes it from other classes/ Year group.

Year Group	Class Name	Category	No of Students	PT Teacher	Classmate
YEAR 1	YEAR 1/1	Active	10	Mr. John	10
YEAR 2	YEAR 2/1	Active	15	Ms. Jane	15
YEAR 3	YEAR 3/1	Active	20	Mr. John	20
YEAR 4	YEAR 4/1	Active	25	Ms. Jane	25
YEAR 5	YEAR 5/1	Active	30	Mr. John	30
YEAR 6	YEAR 6/1	Active	35	Ms. Jane	35
YEAR 7	YEAR 7/1	Active	40	Mr. John	40
YEAR 8	YEAR 8/1	Active	45	Ms. Jane	45
YEAR 9	YEAR 9/1	Active	50	Mr. John	50
YEAR 10	YEAR 10/1	Active	55	Ms. Jane	55
YEAR 11	YEAR 11/1	Active	60	Mr. John	60
YEAR 12	YEAR 12/1	Active	65	Ms. Jane	65

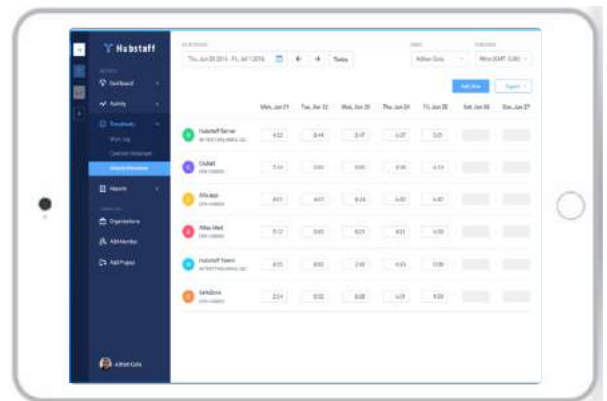

Human Resources Management (HR)

educare understands that human resources management is equally core in ensuring schools' improvement. Therefore, our system is fully integrated with active HR facilities for easy monitoring and management of certain sensitive sectors of the institution such as recruitment and payroll mobilization; as well as staff attendance and staff performance appraisal et cetera.

Time Sheets

Timesheet is a piece of paper used to track the time each worker spends on a job. educare has succeeded in digitalizing this traditional method to ease and better efficiency. Just in all cases, educare eliminates these rigorous paper works and minimizes errors close to infinite which occur during manual entries. educare uses a timesheet to track hours worked, leave time, accruals in order to adjust when processing payroll.

Recruitment

Automate processes, increase productivity with educare recruit. Automate your entire recruitment cycle using educare Recruit. Right from sourcing of candidates to managing their resumes and finally hiring them. Save time on manual tasks by automating your workflows. And focus on other things which needs your attention the most.

Ensure that you streamline your entire recruiting process and increase efficiency of your HR departments. Automate sourcing, tracking, hiring and setup your team to interact and collaborate.

Performance Interviews and Appraisals

Use employee information to set up, monitor, and appraise work goals and achievements, with educare HR's performance assessment tools. Employees can also use the self-service portal to contribute to their performance appraisals, which can begin the performance dialogue.

Payroll and Budget Forecasting

Use educare HR to prepare and process payroll, annual reports, accounting, payment management, and expenses, time and activity tracking.

- Payroll setup can be done for variations of earnings and deductions. Instant amount changes in payroll is supported
- Payroll can be collectively assigned to employees sharing similar pay structure and frequency
- HR Admin or the employee with privileges can generate pay slips based on payment frequency

Plan your employee budget, portfolios, company segmentation, and manage time and activities.

Expenses

The educare system provides for expense monitoring module. This Ensures policy compliance and follows up on the employees to stick to policies and never go overboard on T&E expenditure by setting up spending limits.

- Audit expense reports better with a dedicated audit trail report, audit expenses effectively and ensure there are no phony expenses, come tax season.
- Automate expense accounting as expense data can be synchronized automatically with your accounting software, enabling effective expense accounting.

Attendance Tracking

Set your organization's work hours tracks, track your employee attendance and make your payday stress free. The Attendance module keeps track of all staff attendance, Time in, Time out, and also integrates with biometrics. No more paper pushing, attendance register ... by integrating with device, it helps you completely automate your attendance process.

Configure your attendance principles, connect to remote devices and leave the rest to educare. Close integration among payroll, attendance and leave management allows you define your payroll formula with ease.

Leave Tracking

Leave tracker facilitates online leave application, and approval with notifications. Leave reports also supports monthly and yearly Leave balance.

Supports:

Leave entitlements

Leave Carry Forward

Leave encashment

Bulk Leave Approval

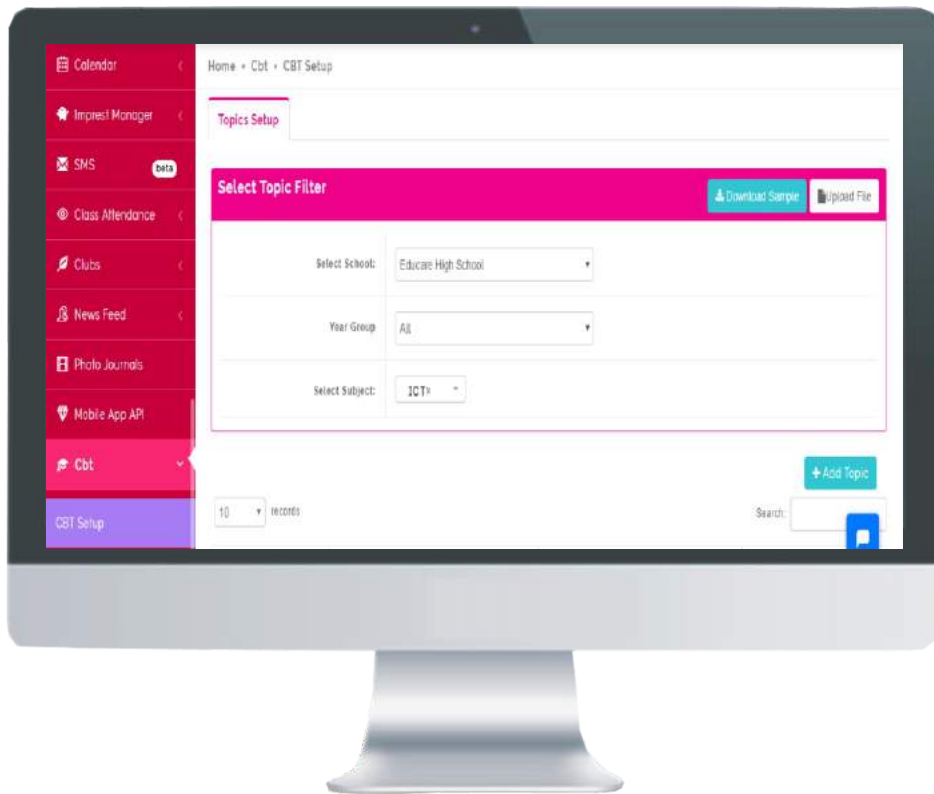

“ educare is a wonderful platform. Every of our staff testifies to that. They have automated our every process. Staff management has become simplified with the new educare system.

The school now manages efficiently all our staff welfare: Recruitment and promotion, Attendance and performances are now accurately tracked from my desk. It suits us very well.

”

Mr. John Trowell

Head of School, Bereton Schools, Port Harcourt

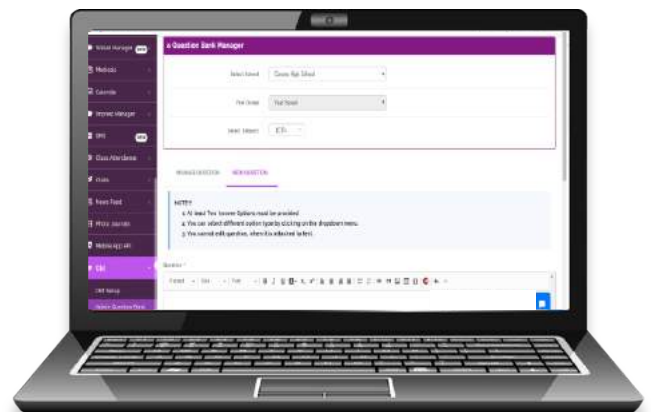

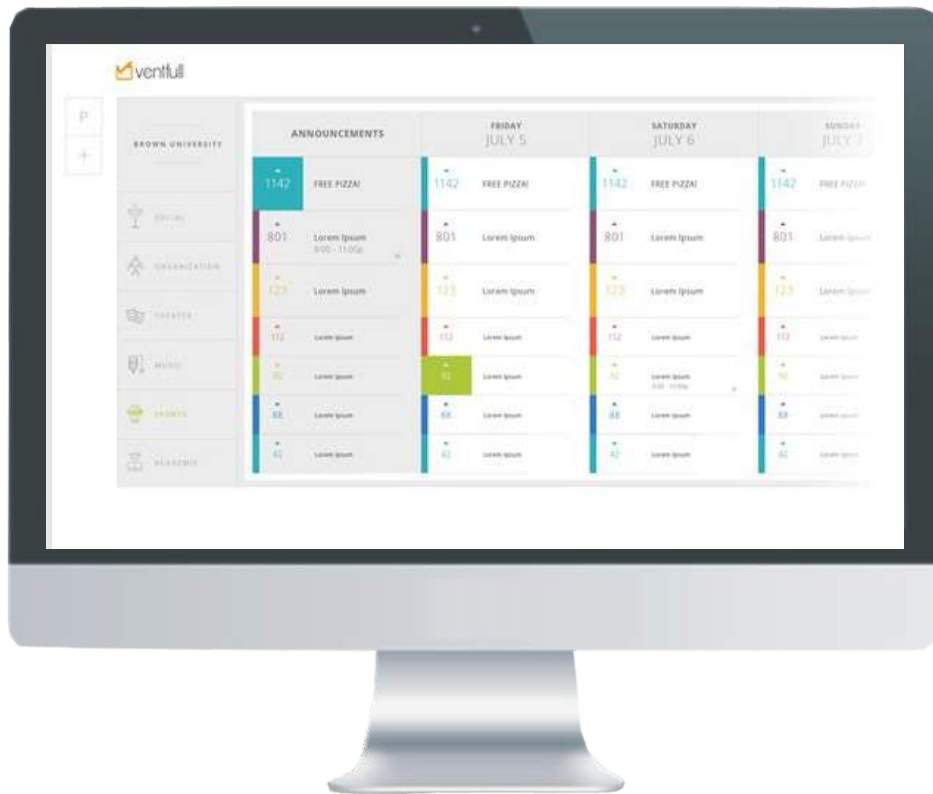

educare helps the schools with their questions for classes to be used as a computer-based test, CBT, this is the future of assessments and exam and we are preparing the students for the future. Seamless result import from CBT test module.

Question Bank

educare enables teachers organise all quiz/exams questions used in the course of study into a comprehensive Question Bank. The questions can be added directly to the question bank or while building a quiz.

The questions in a category can be added to a Quiz or to a lesson activity via checking the question in the system.

educare's timetable module has been helping schools and colleges of various sizes schedule and manage timetables

- With drag and drop option in timetable, VP academics can efficiently pre-set the timetable for all classes for any term before the academic year begins
- Administrator can create different class timing sets for different types of periods
- Subject allocation to the teacher can be done as a setting to be able to assign the same teachers in the timetable
- Teachers can check their timetable from their login and plan accordingly
- Students can check the complete timetable for the week or a specific day activities
- Institutional timetable report can be taken out for analysis or to put on the class's notice board

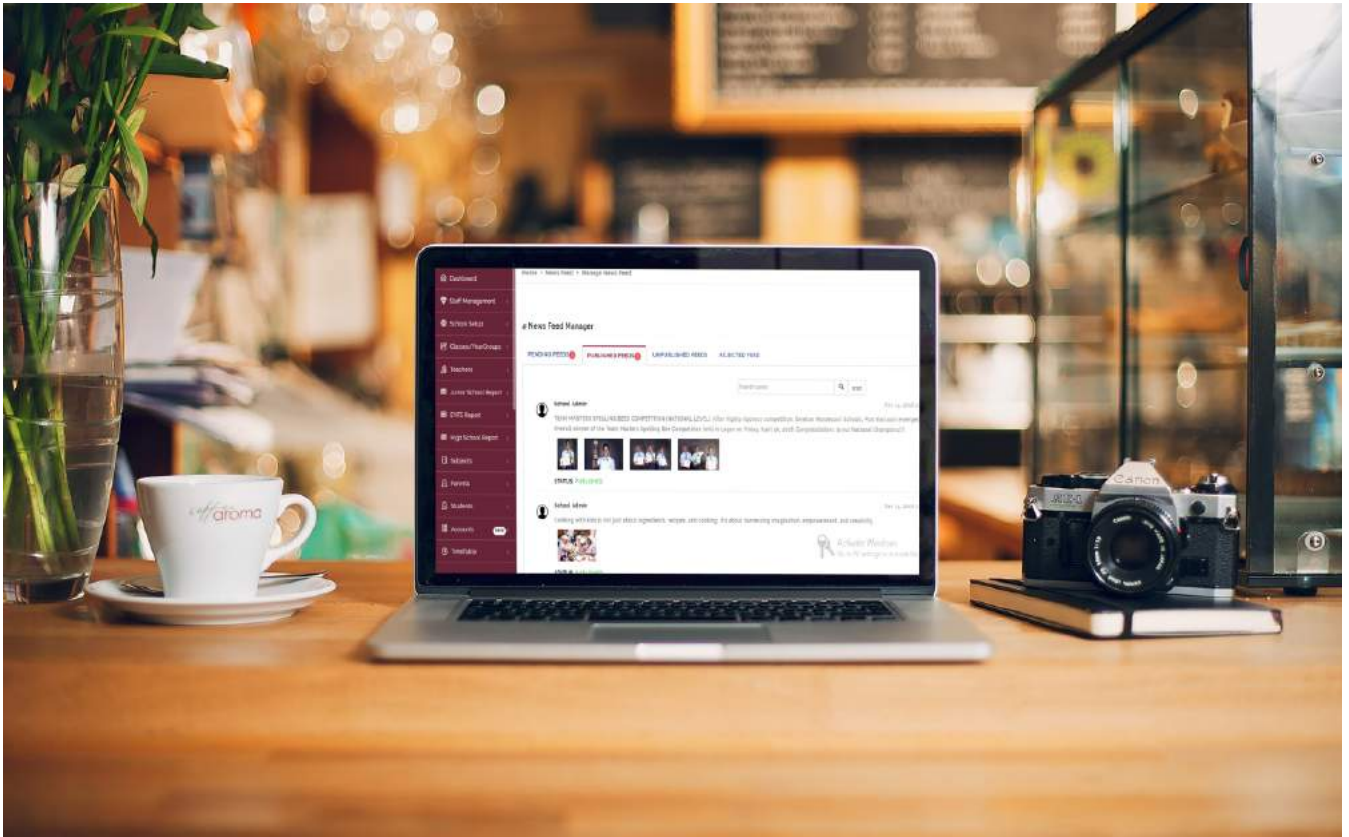

“

I find educare timetable most impressive of all the entire features...

Now we generate and adjust our school timetable and other schedules on the platform. Assignment of classes/periods and switches have become easily possible. Our teachers enjoy the ease so much

”

Rev. Fr. Kenneth Mereh
Assistant Administrator, St Gregory's College, Ikoyi, Lagos

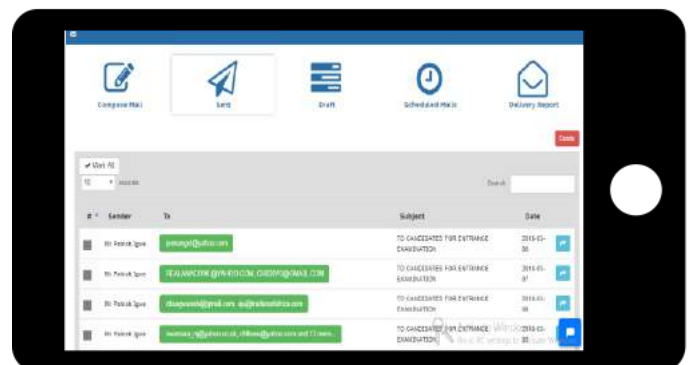

Every school faces a common challenge of connecting parents, teachers, and school Administrators. This is core in our drive to better school management.

Our system is enriched with communicative modules which enable easy flows of end-to-end information from schools to parents to students to bridge the existing gap between the quadrangular community: SCHOOL – PARENTS – TEACHER – STUDENT. We connect them all in one single App. With our NewsFeeds, SMS and Email systems, notifications, reminders are sent across board to default recipients.

Personalized Email Integration

With educare, the school's administrator has the enablement to send emails/SMSs to employees, guardians and students; and can also give privilege to any of the employees to do so.

- Automatic emails/SMSs can be setup for specific recipients on specific events.
- Emails/SMSs could be sent to employees or students or guardians when necessary.

News Feed

The school's news is easy to create and publish with this feature

- The administrator can create the news by adding videos, images, rich text, etc. and publish it for the parents, staff and students
- Multiple attachments could be made with the news for better clarity on the contents

News Letter

educare has a newsletter module which is an email marketing tool to inform parents at home/work place about anything and everything school related anywhere they might be: school activities, policies, news, schedule changes, updates/events, performances, student awards, and community happenings. Our simplified school newsletter helps students and parents stay informed on upcoming events while outside the school.

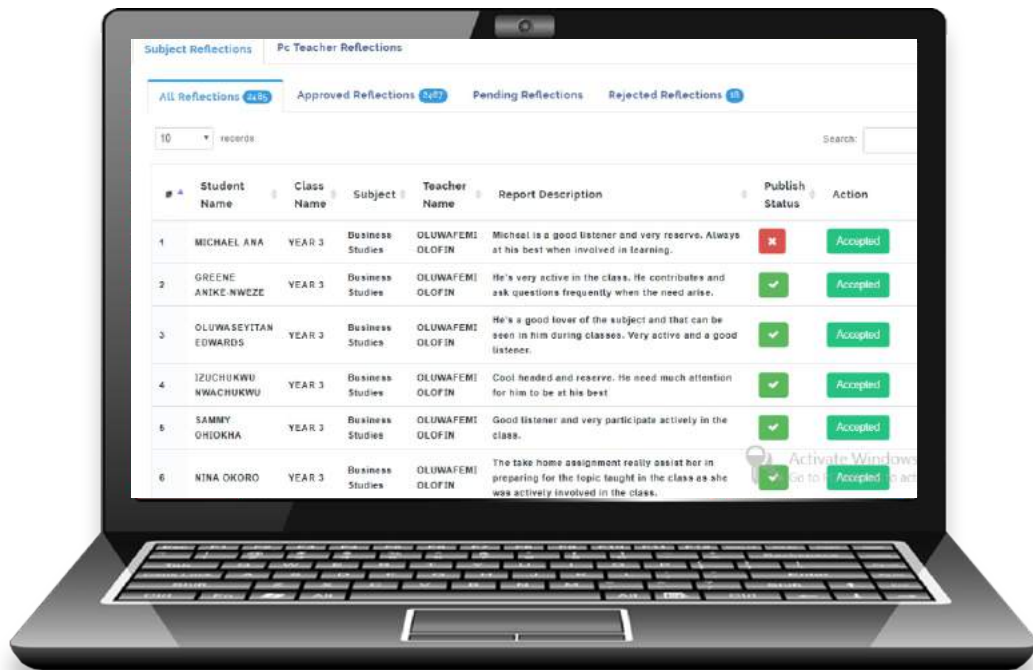

I am thrilled with the ease of use, the incredible customer service...
It has gone a long way to improve how we are organized and communicate key information within the school and with our parents.

Mrs Obiageli Attoh

Head of IT, Charles Dale Memorial International School, Port Harcourt

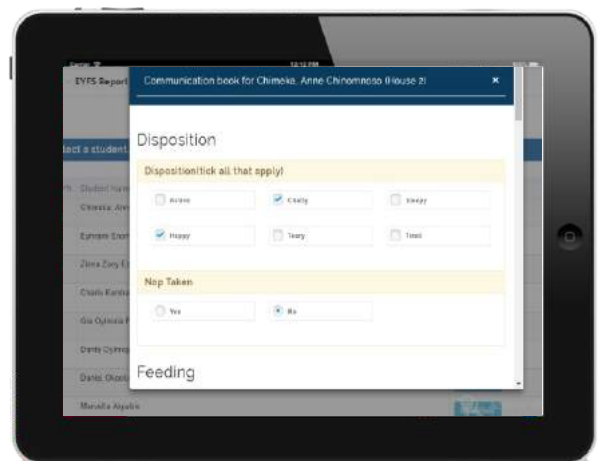

One outstanding peculiarity of educare system is the ability of the system to circulate prompt information from the school to the home and vice versa. Our Communication Book and Weekly Reflection modules for Early Years and High Schools respectively have made behavioural checks of the students very simpler for Subject Teachers, Head Teachers, House Masters, Guidance Counsellors and Principals in evaluating students' overall learning progress.

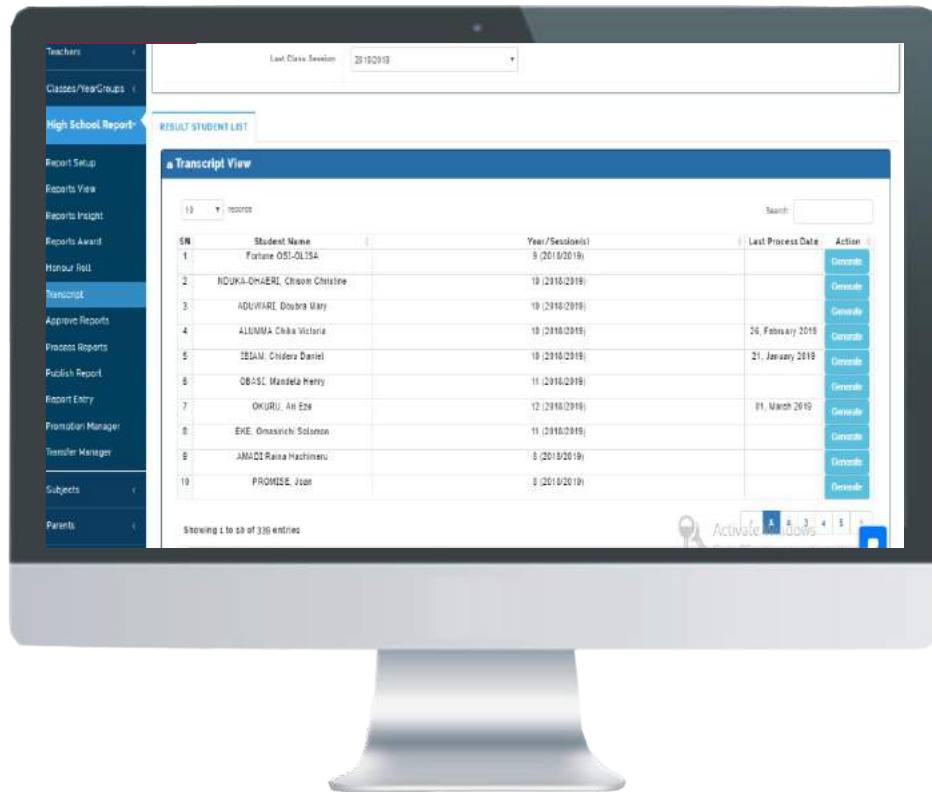

The beauty of this feature lies in the ability of the above school staff to transmit the results of these assessments so parents could see them daily or weekly as they are published.

Communication Book/ Weekly Reflection

The class teacher uses this platform to relate her daily experience with each given pupil/students to the parents. The activities and progress rate of a child is communicated directly to the parents for quick follow-up

- While the Communication Book is exclusive for EYFS, the Weekly Reflection is used with Junior/High Schools.
- Such communicable information as the child's day's dispositions, as feeding response, toileting etc. are transmitted to the parents promptly.

When a student graduates or leaves your school, his/her data doesn't get wiped out of the database, they can access their data on educare Alumni Module. For alumni seeking to get transcripts of their previous report cards the alumni module does the quick job. The school admin doesn't need to start searching for files, all the necessary data are all in the system – just a click away!

Transcript Generation

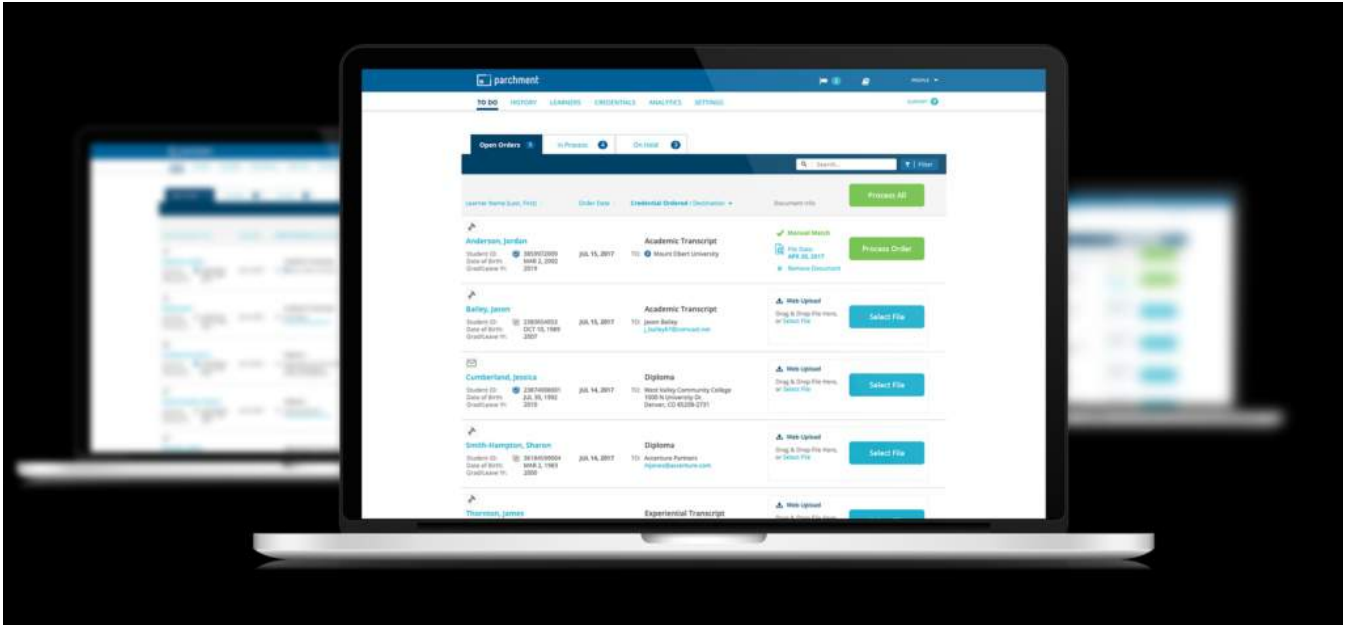

It's simple... We digitize, students do the ordering; whilst the school does the processing.

The educare platform has taken away the rigors of manual transcript requests. We have made it all possible from any location. Students make payments through our platform, the school admin clicks on to the transcript module to generate the transcript. Our automated system delivers prepared transcript within few hours; and delivered to academic institutions, prospective employers and other recipients through our integrated Electronic Transcript Delivery Network or by traditional surface mail.

Easier and quicker, aborts human error and Students' records are saved, even 10 years down the line

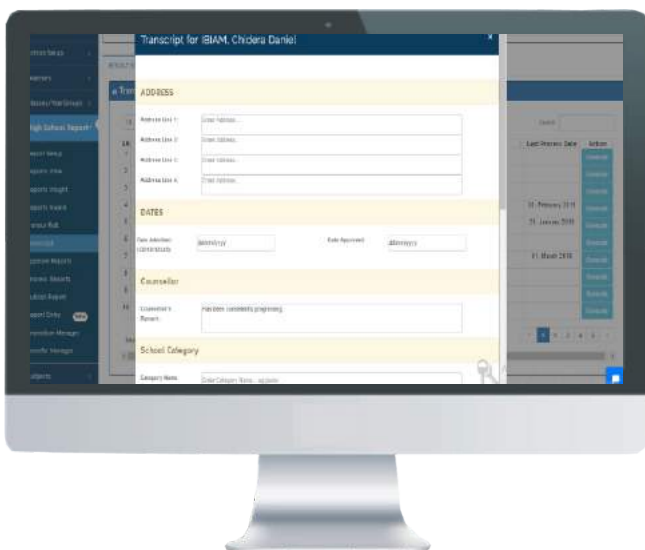

Transcript Delivery

Our network consists of secure servers which support various protocols for transferring files. Files get sent to the exchange using a variety of protocols and methods. Once the recipient is determined, the files are delivered to the recipient's secure FTP mailbox, where they get retrieved at any time and frequently.

Transcript Request and Payment

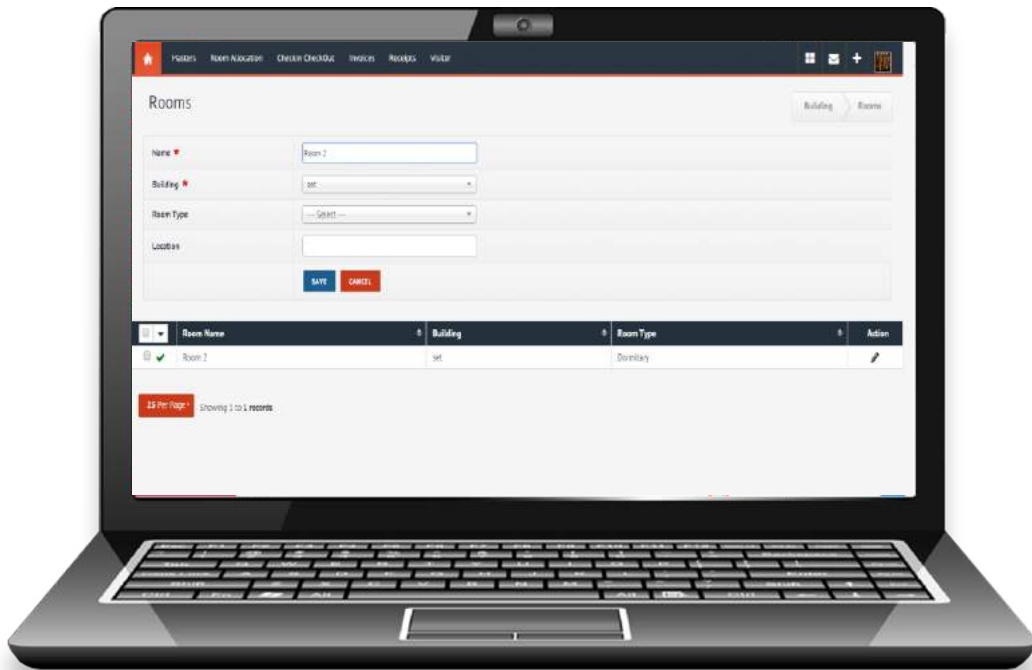

In educare partner schools, students pay online to facilitate transcript requests, with our transcript request and payment solution, alumni from far and wide can put in a request for transcripts, make payments online, and have their transcript sent via email and/or mail post.

Tracking students' performance to progress trend - educare has empowered parents/teachers as well as students with a tracking solution which they use in following up their progress in school. By letting students see trends in their grades and attendance marking, we make data fun to translate.

Through educare, students have been able to gain points or level up for things they do at school; including extra-curricular activities. Students use our platform to monitor their ranking among their fellows. The goal is to encourage them keep up the good work at school through positive reinforcement.

As part of our automation and digitalization processes, educare generates all boarding students' data into hostel management module so as to enable schools ease up the process of running the day-to-day activities of the school's Dormitory.

Our system manages all tasks: allocations, schedules, fee collections, track of fee defaulters, name it. For the students, it offers an easy option to choose a room based on their preferences and requirements. Also parents are not left out, this module allows parents and guardians to check their ward rooms. It also allows them track the activities of their ward remotely and take up any disciplinary action when necessary.

This module reduces the number of staff involvements and also reduces paperwork as well as keeps track of logistics and maintenance charges, etc.

The educare Hostel Management module offers a systematic approach to the entire hostel running and ensures accurate control of administrative processes of the hostel. Some of the beautiful features in this module are as follows:

- Student Check In – Receipts Confirmation, Assignment of basic Bedding Materials and so on
- Bed space allocation
- Attendance follow up/Head count
- Roles Assignment
- Meal management
- Visitors check
- Gate Pass

Bed Space Allocation

The old fashioned way of allocating bed spaces in hostel has proven burdensome and rigorous. This propelled the automation of the entire process. The analogue process had mostly been associated with the following setbacks:

- Inefficient Service Rendered
- Struggling for Bed Space by students
- Poor record keeping which encourages illegal occupant of a bed space
- The processing procedures is prone to errors

All these pose as challenges and always result in conflict among the students; but educare Hostel Management, automates with efficiency the allocation processes, thereby solving the above challenges.

Our system enhances allocation processes, captures and stores all information of students in a given hostel, enables quick access to information of a particular bed space occupant; and students could apply for bed spaces online (on first come first serve basis).

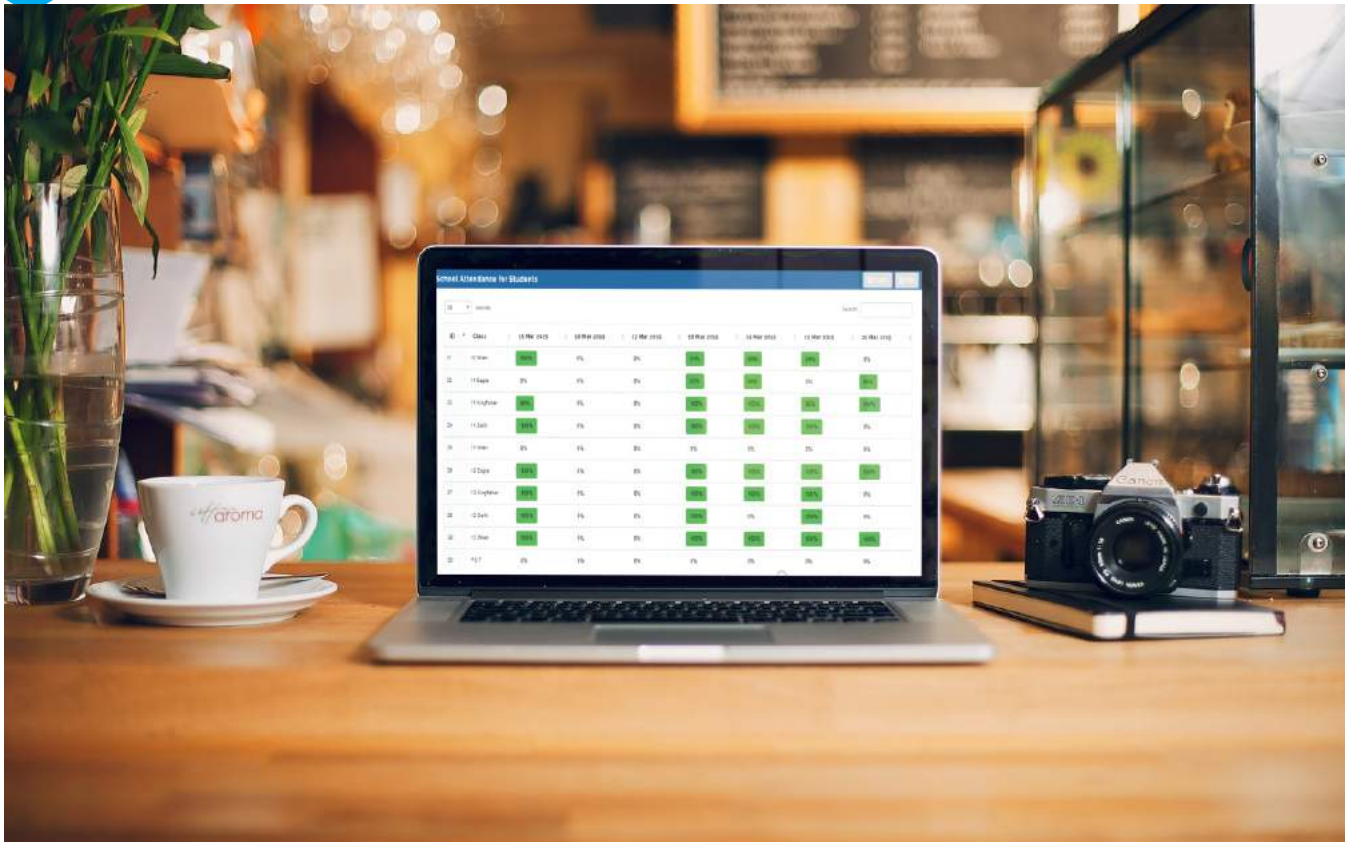

Meal management

Feeding Timetable, Meal Plan and Menu Management, Feeding Table Assignments and so on are automated here.

Featured here, the Meal item expenditure for each student in the hostel is calculated for each month, per student and displayed. educare equally offers Menu Management module to track and manage food orders, manage food stock and create alerts to replenish stock when needed. educare expedites meal and activity tracking for schools making it possible for school authorities with parents to keep record of the daily food served to students along with the timings.

Roles Assignment

This Module handles the hostel management duties reducing labour cost and improving overall efficiency. educare System provides a platform where hostel functionalities and data base are stored. Users henceforth have access to information on the respective hostel functionalities ranging from the House Master/Mistress to Hostel Prefect, Sanitary, Labour, and Utility Prefects.

Being able to take student's attendance is usually a primary feature on most schools today. Therefore, educare provides a wide variety of reports on attendance by class, individual student, gender, etc for the whole term. The use of pen and paper for attendance capturing is obnoxious; this is why we came into the system to eliminate paper works entirely.

Attendance Tracking

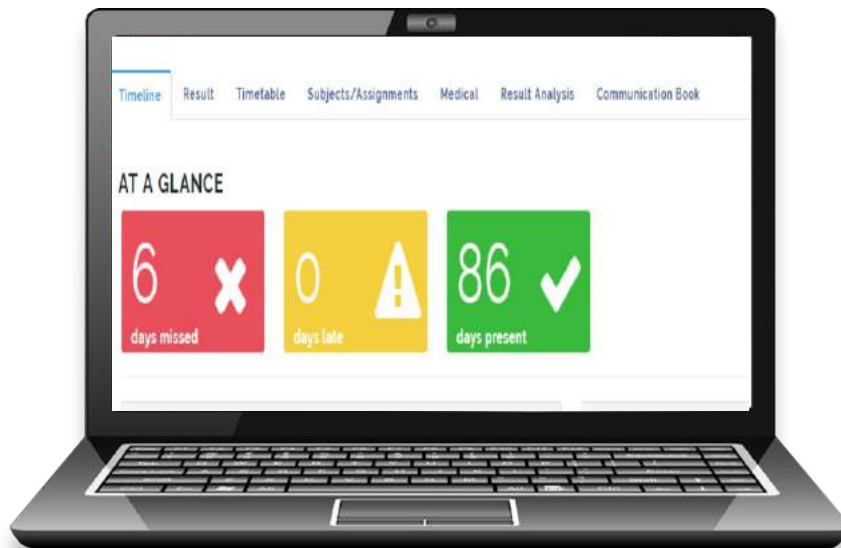

To benefit from school, students need to be in school. With educare, teachers mark attendance and track the attendance records of individual student.

This step has also encouraged gauge interest in certain subjects/classroom attendance trends on a broad scale- guided schools in making better classroom decisions.

Attendance tracking is a feature which has helped in tracking student physical, emotional, and mental well-beings - if there are sudden changes in a student's attendance record, teachers and management are able to flag the same for follow up with their parents.

Attendance Notification

educare provides a platform for attendance notification to help in parents' involvement with the student and school.

educare has made it easier for your school to send automatic alerts to the parents if their wards are not present in school. You can be sure that this is something that would be impossible if you were using a manual system. However, educare, stores all necessary data related to your school, and makes it easy as it gets. In fact our platform contains the contact details of the parents and this has made it easier for schools to send notifications to the parents as well.

Parents too have benefited from this as they are able to stay updated with the attendance related details of their children. They have a clear idea of the number of classes that their children are missing out on.

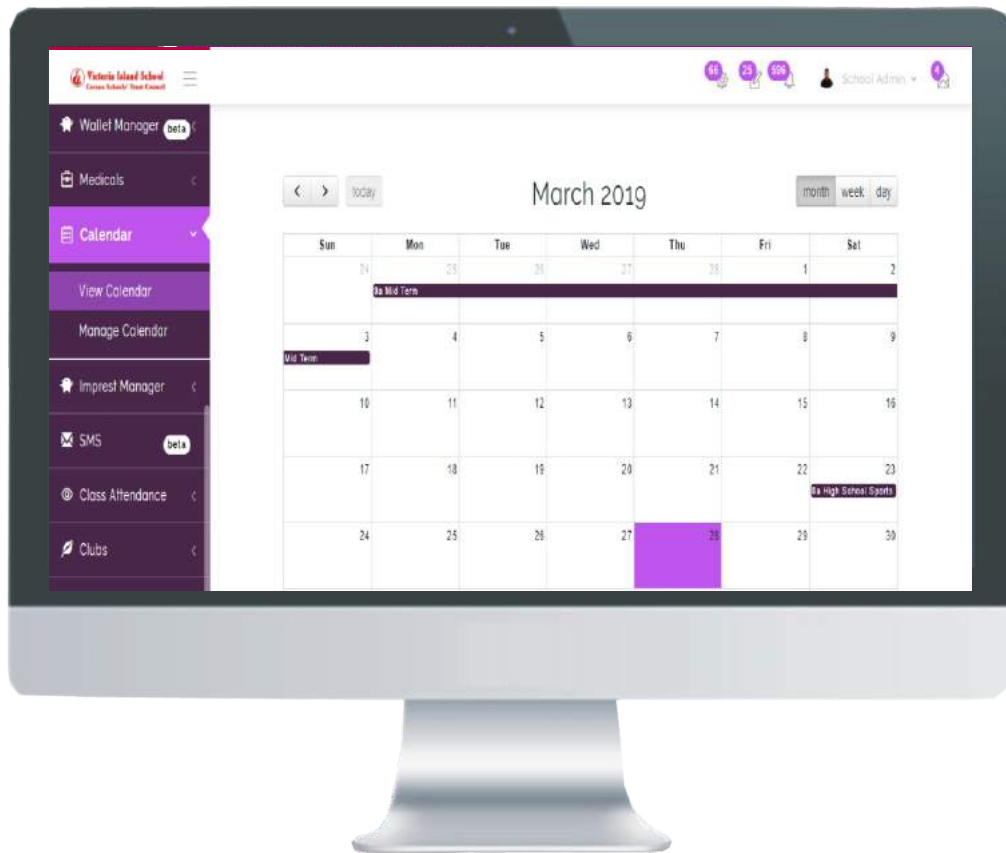

“ We moved from a very expensive and ridiculously difficult system to this one and it has made things so much easier. So far we use educare mainly for the Report Card and Attendance and it works really well.

Attendance has gone through some changes since we signed up in September 2017; a little confusion at first, but once you understand how it's used (contact support) it's quite simple to use.

”

Mr. Timothy Utor

VP Academics, Starville School, Gwarimpa Abuja.

educare has a smart way of keeping tab of all school's events and general programmes with an automated notifier which keeps teachers, parents, students and the school management abreast of the dates, time and other information concerning the events.

The Events Schedule in educare alerts the users about ALL upcoming school's events/ programmes/ occasion VIA SMS or Email.

- The admin is responsible for setting up the notification in the App to enable it.
- Additionally, the scheduling could serve as a prompter and medium by which the management advertises any new school's projection to the knowledge of the parents, teacher and students alike.

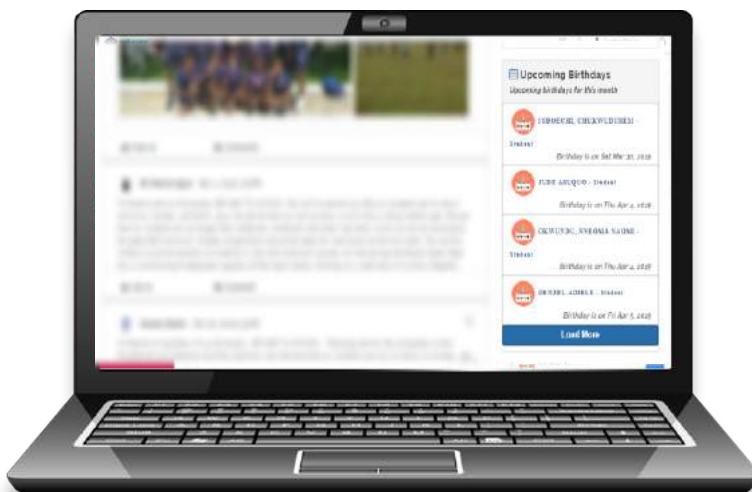

Advance Scheduling

The upcoming programmes/events/occasion of the school pop up as notifiers with educare. The teacher, parent, students and management all are notified ahead of the date of given event/programme.

The upcoming events could be customized to include World Day celebrations; if the school so wishes.

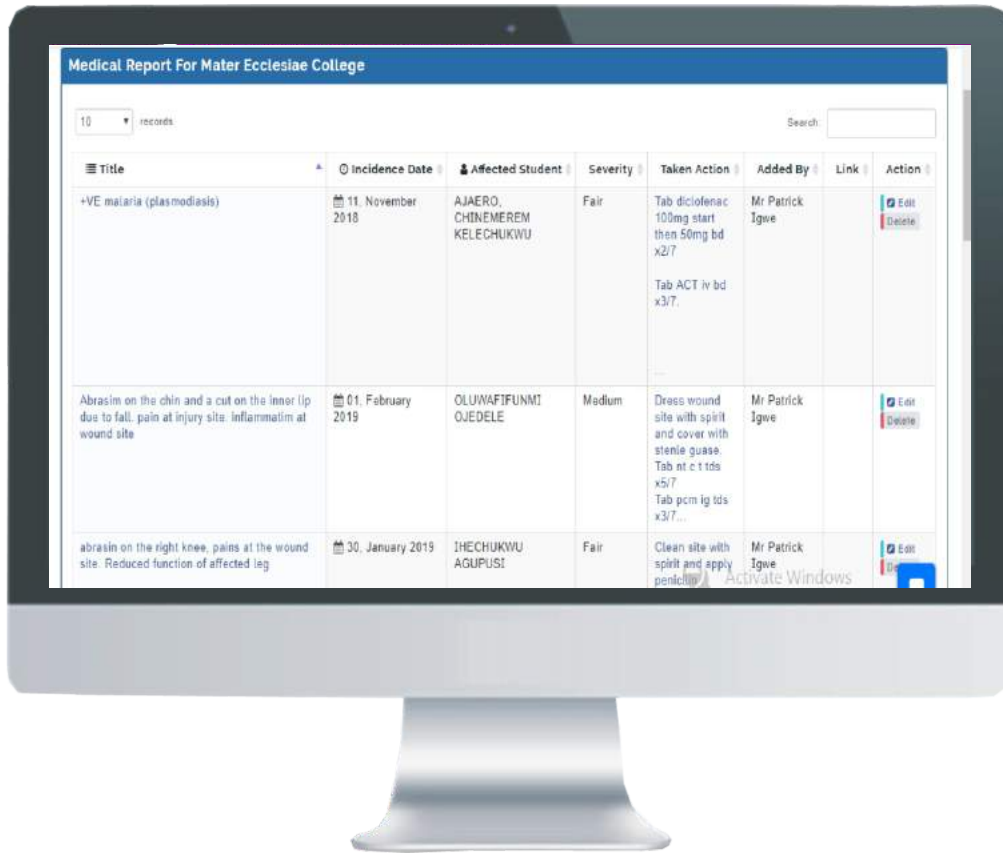

Birthday

educare App is blessed with a birthday notifier feature which enables parents, teachers, students and school management to know whose birthday is when.

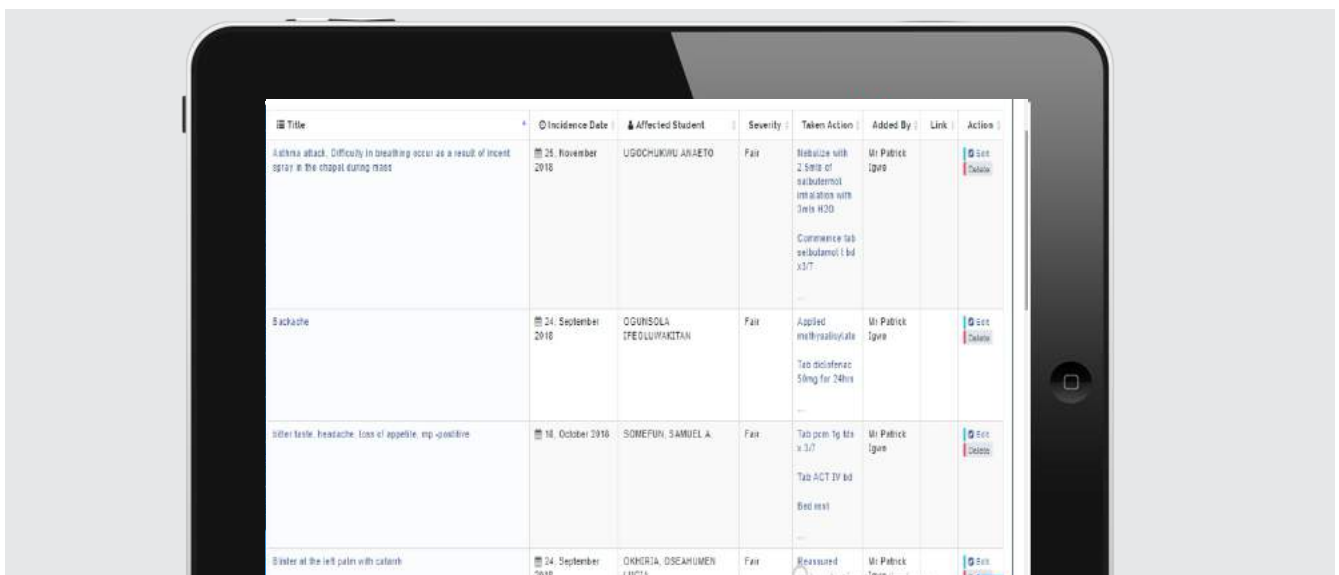

This feature concretizes communal living within the school's community at each student's birthday is marked and observed by everyone.

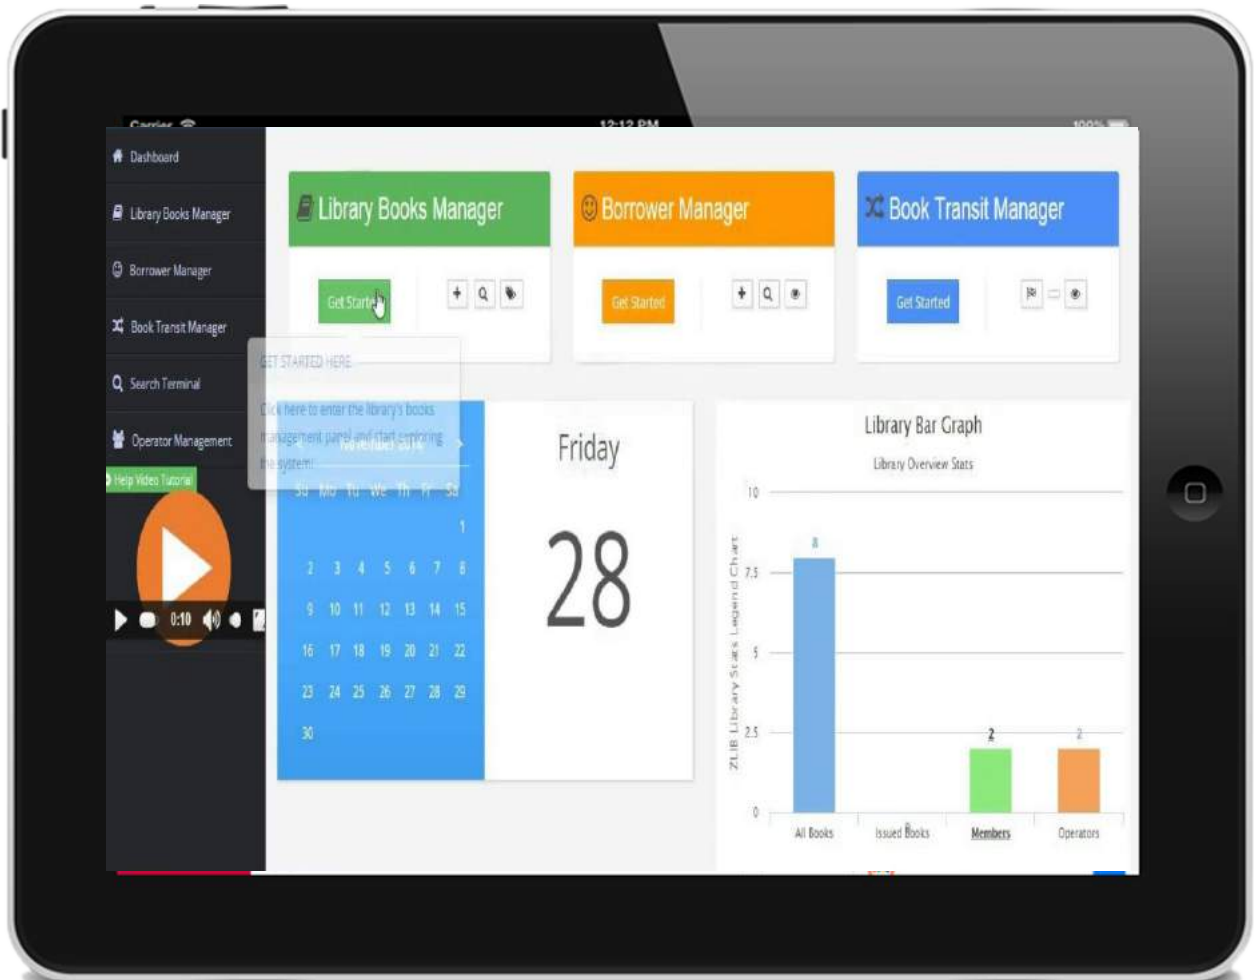

Events and Calendar

educare is also enriched with a medical record module which has helped to manage students' health records.

We introduced this module to overcome all forms of emergencies which occur within the school premises. With this module, all records and history of student's health issue; including specific description, Prescriptions/Treatment, and precautions undertaken and under whose supervision are carefully preserved for future reference.

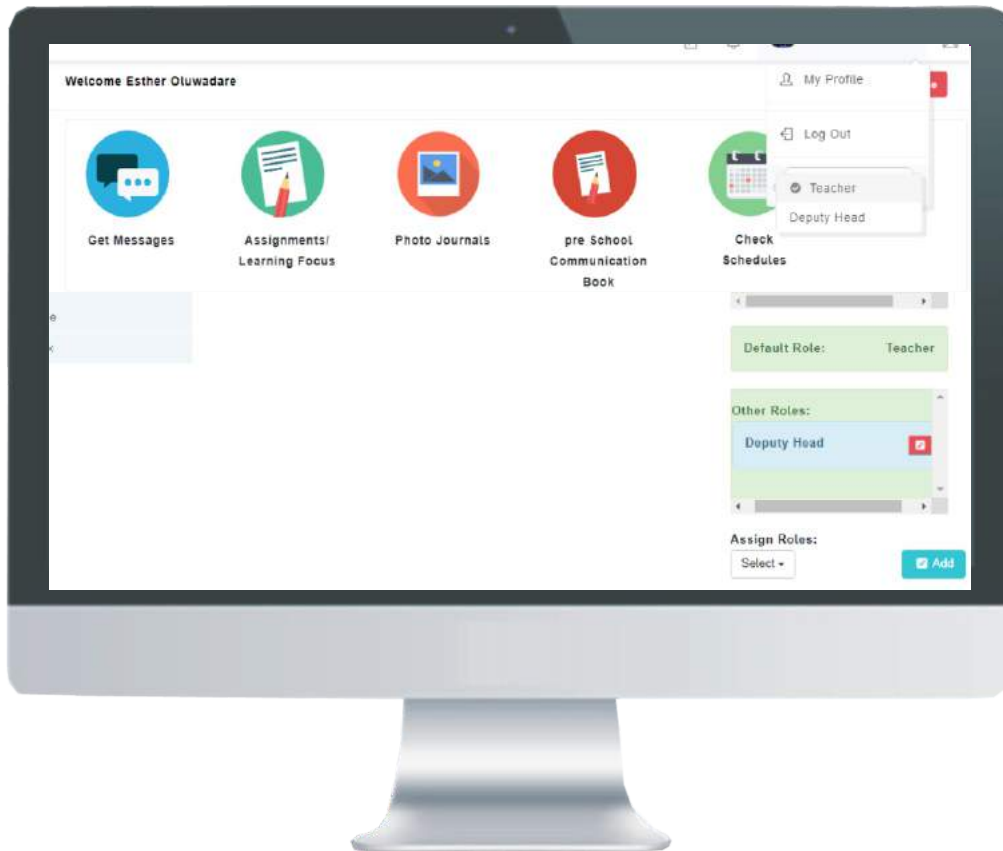

Using library management, librarian of your School can organize and manage books with all details available for the books.

Students can search the book details from their dashboard and issue or reserve books

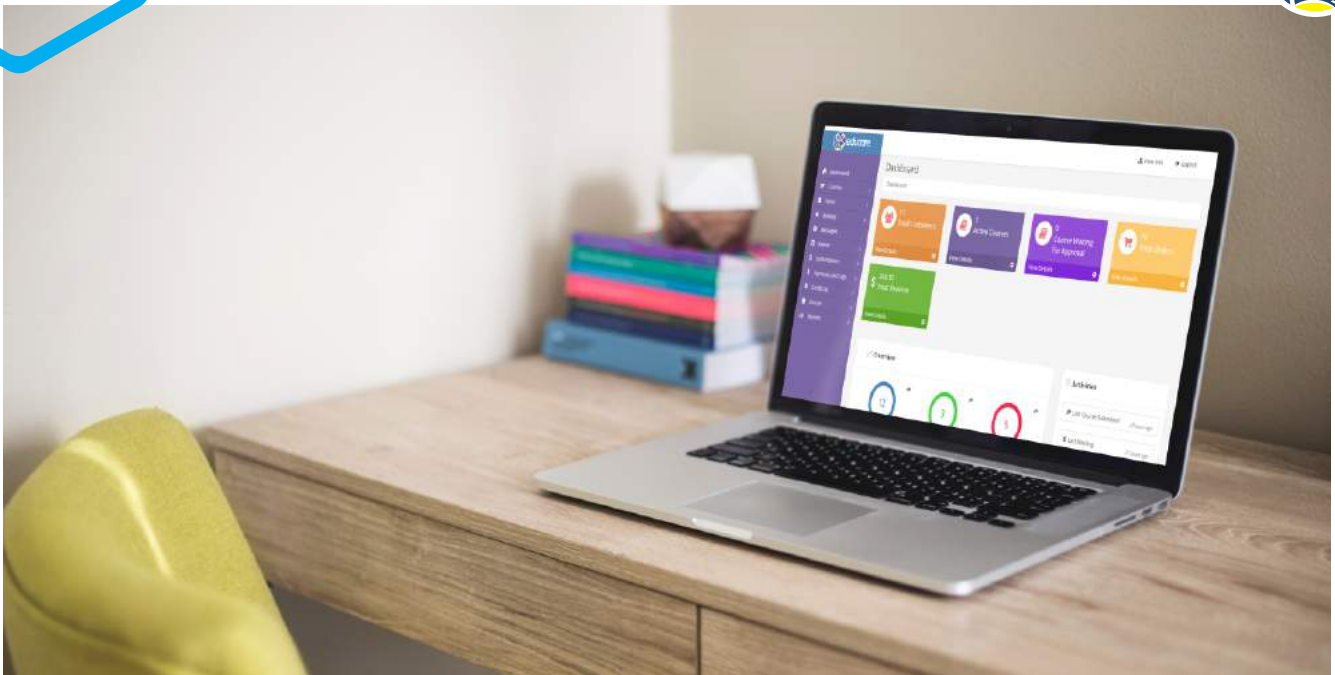

Librarian can tally records by generating the list of books issued or due for a given duration.

Custom Roles

With the awareness that there are cases where a particular teacher is assigned two definite roles in a given schools, educare made a special provision for such complexity.

Instead of creating a double profile for the teacher, possibly as HEAD TEACHER and CLASS TEACHER, we integrated the two roles into a single account to enable the teacher navigate between the roles with ease and still deliver efficiently in each.

Our Learning Management System (LMS) provides you with content using different multimedia elements. Our e-learning enables you manage students, track their progress and deliver courses online.

With our e-learning solutions you have the following at ease:

- Run a live classroom and give you the ability to record, edit and publish ALL your lessons.
- Replicate the communication and interactive properties of the physical classroom in an online space.
- Access to prompt technical support services for both teachers and students.
- Engage Teachers, allow customization of specific classroom needs.
- Create & publish learning content without any prior programming experience.

What we bring to your table are effective and interactive education opportunities.

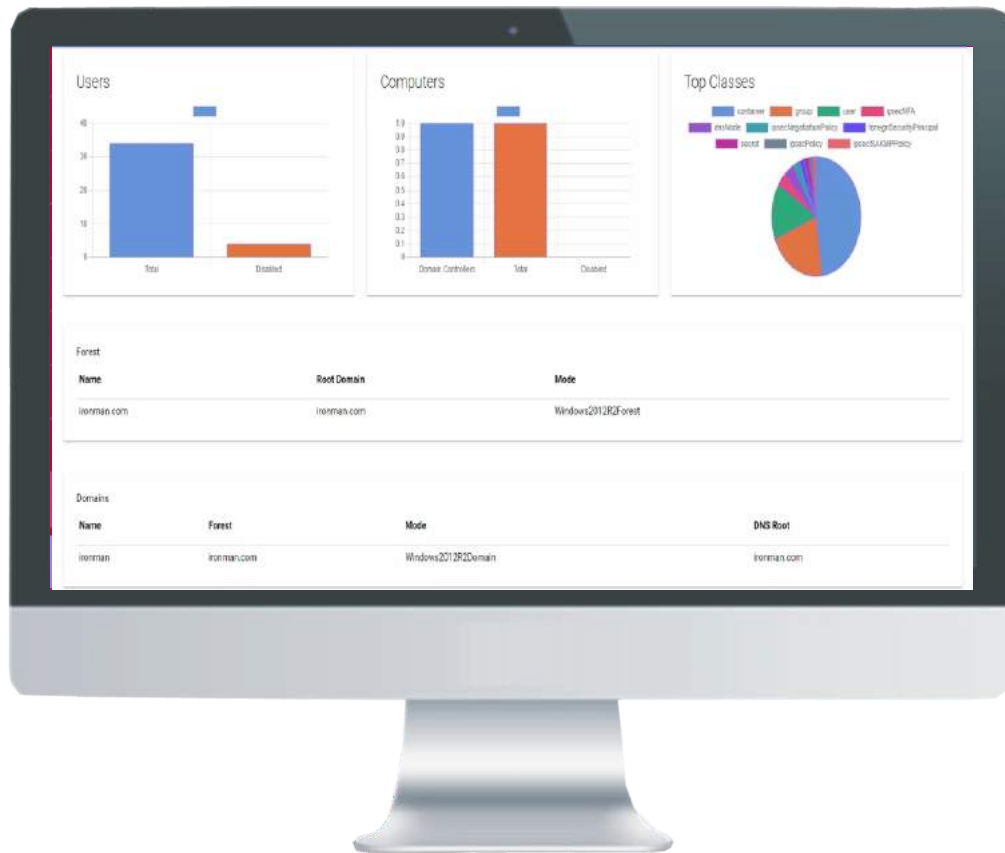

“

It does not require extensive training to learn how to use; the parent portal gives parents all the info they need at their fingertips; it has centralized all of our student info and made it accessible to all staff who need it.

The report card design process is great... you can really customize it to suit your needs; they are constantly releasing updated and improved features based on customer feedback and requests; customer support is always available and very friendly/responsive.

”

Mr Henry Okafor
Head Of ICT, Lekki British School

educare opens up the possibility for great collaboration within different schools; this keeps complete records of schools with ratings like Best Private School or Public School.

educare enables School's communities to store and find contact information with ease without going through the stress of seeking locations.

With educare, parents contact any teacher or the school administrator, by leveraging the custom directory which has made it easy to share contact information publicly and/or privately within the school circle.

Directory are accessed from the school websites and school Portals.

Audit trail is a security feature that records activities of users on the portal. It shows all that happens in the system, who did it, when it was done and what the person did.

We have over time generated and published strategic platforms which our partner schools explore and rapidly grow their schools' public awareness. Our consultancy services are designed to provide resourceful and insightful information as well as introduce our partners to very efficient advert and publicity fronts with proper follow-up towards enrolment growth.

Testimonies from our beneficial partners have convinced us and our prospects that our platforms have incredibly maximized their enrollment tabs.

I didn't think it was as simple as it sounded at first; yet I gave it a try.

Now, everything has changed with educare.

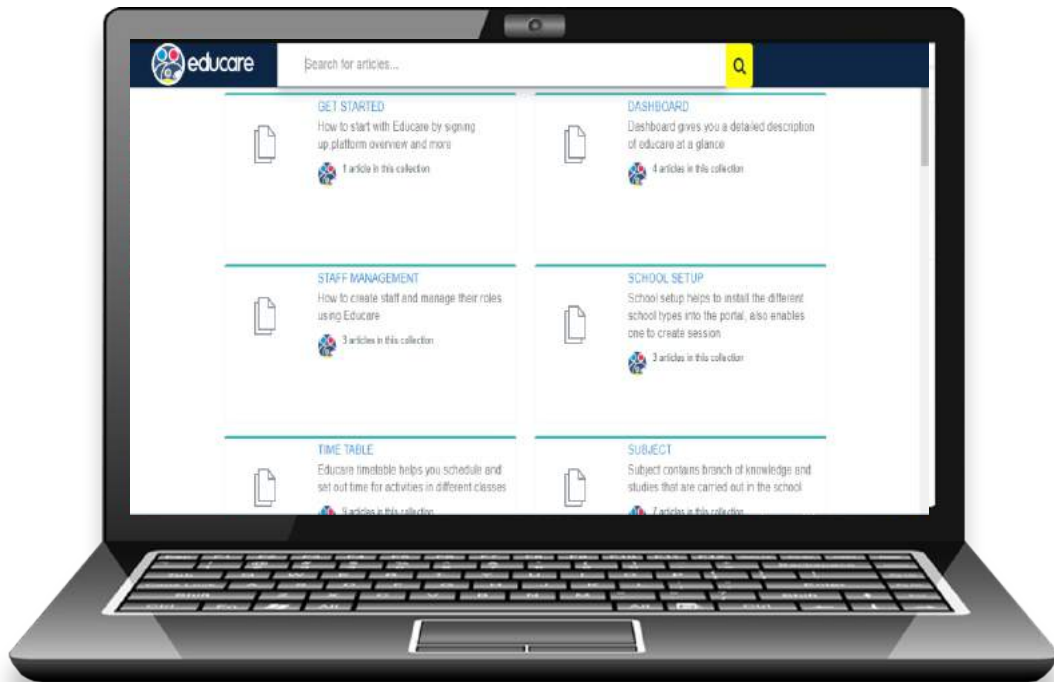

Our very recent admission and enrollment statistics showed that clearly. Consulting with educare is one of the best choices we made in the recent past.

Those guys are good at what they do.

Mrs. Elfrida Omole

Executive Director, Charles Dale Memorial International School, Port-Harcourt.

The educare System additionally has a special Knowledge Base; wherein users could access self-support information with which on-sight difficulties could be addressed.

The Knowledge Base is a platform which divulges all processes and features of the software to users - old and new - showing them the core values of educare. With this Support system, we are able to allow our users give themselves prompt answers to questions before contacting us in cases of difficulty in comprehension.

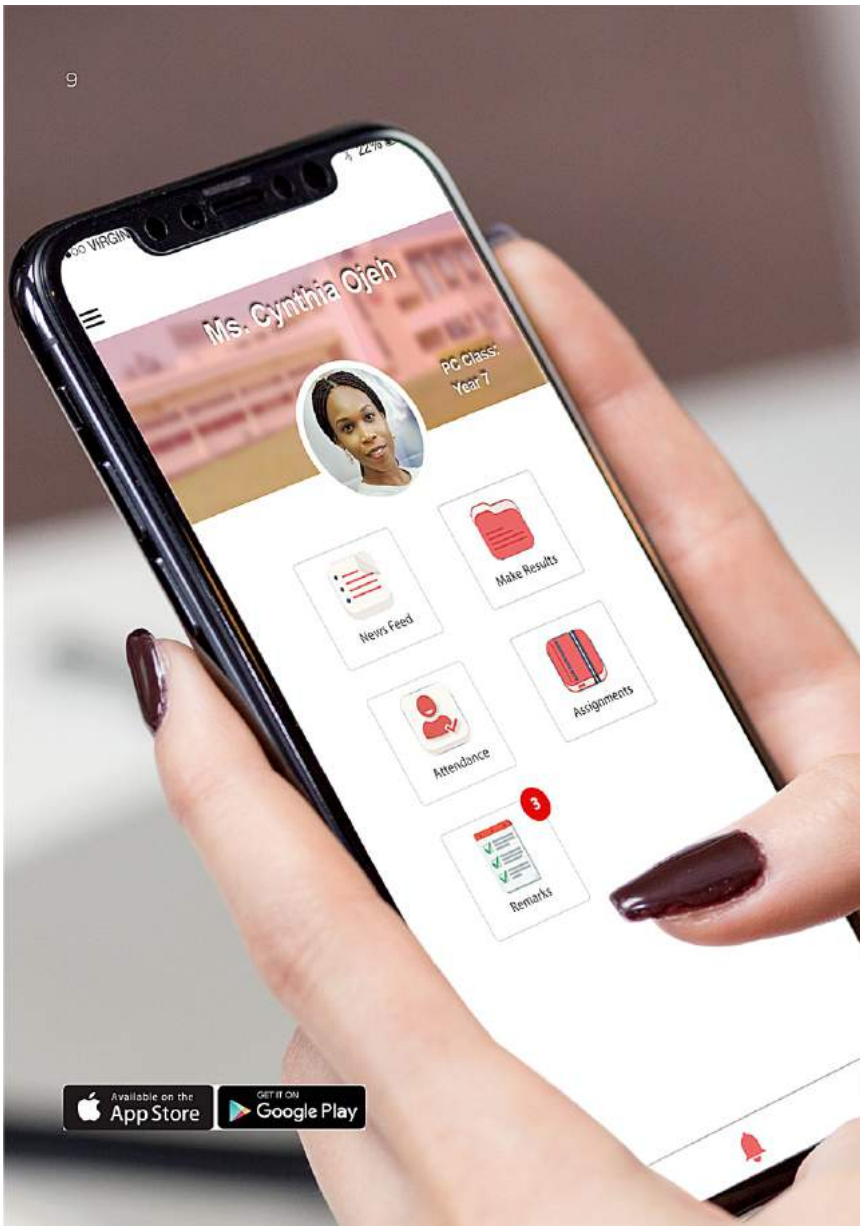

“

It's evident that the team at Educare works hard to make any individual changes you might want for your school

”

Oguguo Chuks

Head Of ICT, His Grace High School, Enugu

In a bid to make our product Mobile friendly we developed the **educare mobile App** – an easy access platform which connects schools and Parents.

The mobile App is for every user: parents, teachers, and students; but it's most useful to Parents and Students who are usually unavailable for computer usage. We developed the App to ensure that parents could follow the goings on in school with their mobile phone wherever they are or go.

Additionally, parents keep an up-to-date view of their child(ren)'s school life using the educare App, especially in key issues such as: Academic Performance, Classroom Involvement, Behavioral Assessment, Assignments and attendance Trails.

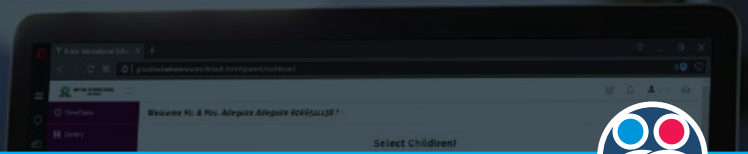

The educare App is available in **Apple** and **Google play** stores for relishing enjoyment of the Parents.

“

“What a fantastic App! Full of functions, user friendly, simple and easy to use. Real time notifications. We concerned parents couldn't have asked for more. I thank God my children's school keyed into this system.”

”

Mr. Chike Ibe
Parent

My biggest win since NBS started is the lunch of educare as the school management software. Both the application and customer relations is amazing. A big thank you guys for taking our school to the next level.

Dhamie Sonde

(Chairman, School Development Committee) - Nayville British school, Benin

What I liked the most about this Software is that it helps teachers to stay organized in their daily planning, but also in the evaluation process.

Amarachi Ararume

Proprietress, Cherry Hills School, Enugu

“educare is absolutely user friendly and time saving. I don't have to spend my nights on busy work, instead, I spend most of my day supporting my students' individual needs”.

Rev. Fr. John Njorteah

Administrator. Mater Ecclesiae College. Epe. Lagos.

**Terms and Conditions apply*

Educare is a School Management Software driven by the same passion as educators.

It caters to K12 schools by automating their academic and administrative processes. Every day we make our platform, customer service, communications, and process better.

Our software is never "done," as we will keep further refining and developing. We will never stop pushing to better serve and communicate with our clients.

As an organization, we celebrate finding ways to get better and implementing those improvements.

WE TURN YOUR IDEAS INTO REALITY
