INTRODUCING e-Lesson PLANNER

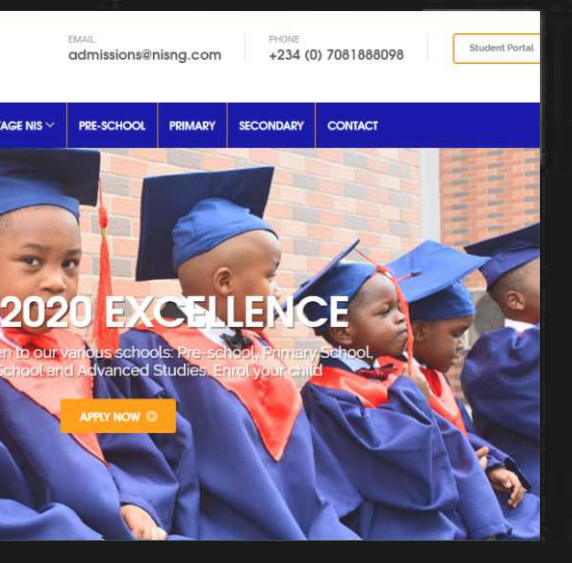

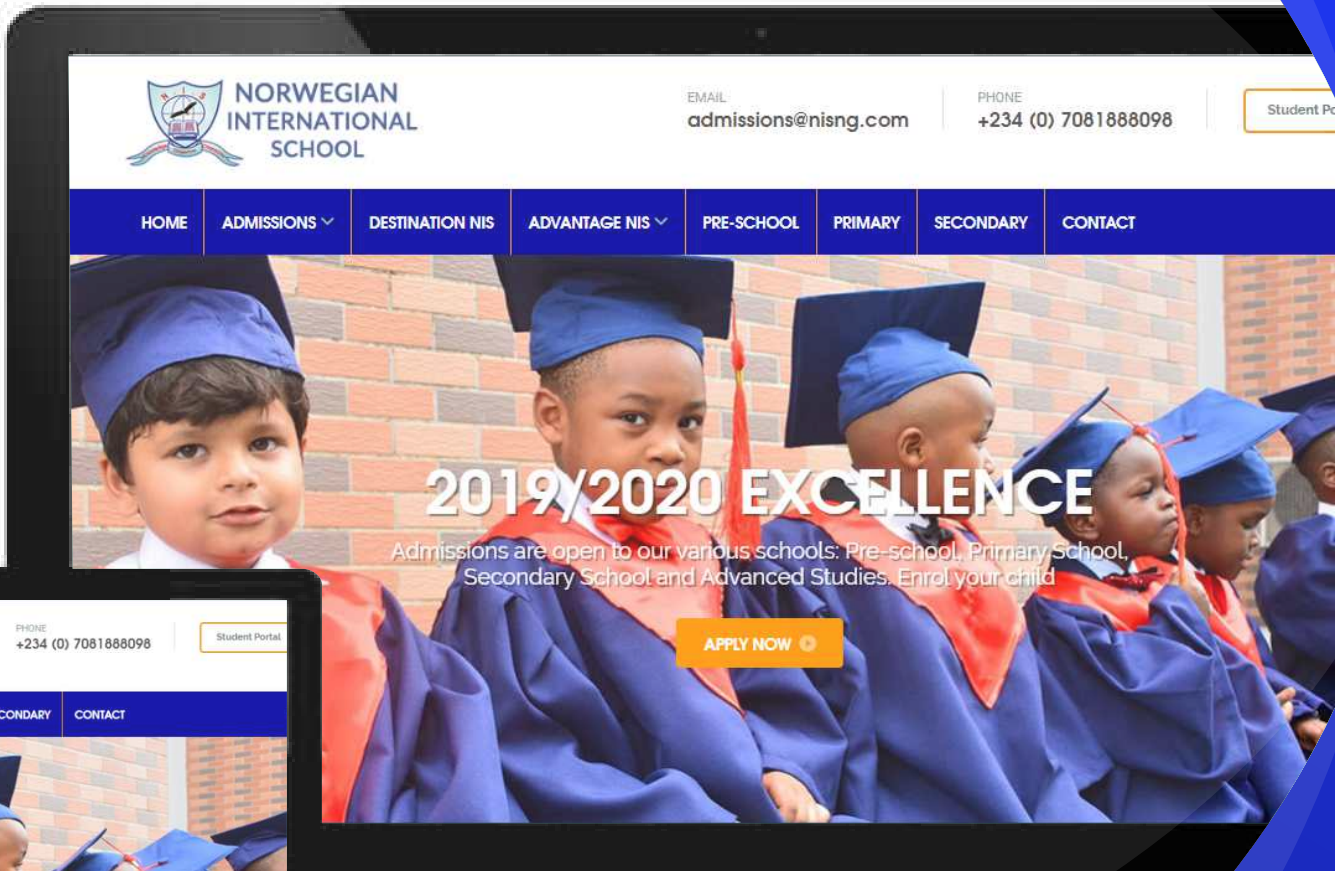

Access the Lesson Plans of any Year group within 60secs.

Teachers can easily input their lesson plans with guided templates and immediately send for approval with a click. The electronic lesson planner module is the future of edu-technology. It's functional e-learning. Concerned with the ease of data generation, safety, and prompt accessibility, the educare platform is enabled with a Lesson Planner module which puts smiles on the faces of informed users. We get schools to generate a Lesson plan Bank for safekeeping and storage of lesson plans for future references and overview.

No more paper and file piling! School owners who have enjoyed this module have confessed that it has helped them store ALL their schools' learning contents, teaching resources and procedures and overall class activities; as well as enabled ease of assessment. Join such schools as Mater Ecclesiae College, Lagos and avail your school of an academic knowledge-Base. First of its kind! Parents and students have testified how much the knowledge base has afforded them reference during off-session tutorial and further studies.

**WEB
CONVERSION**

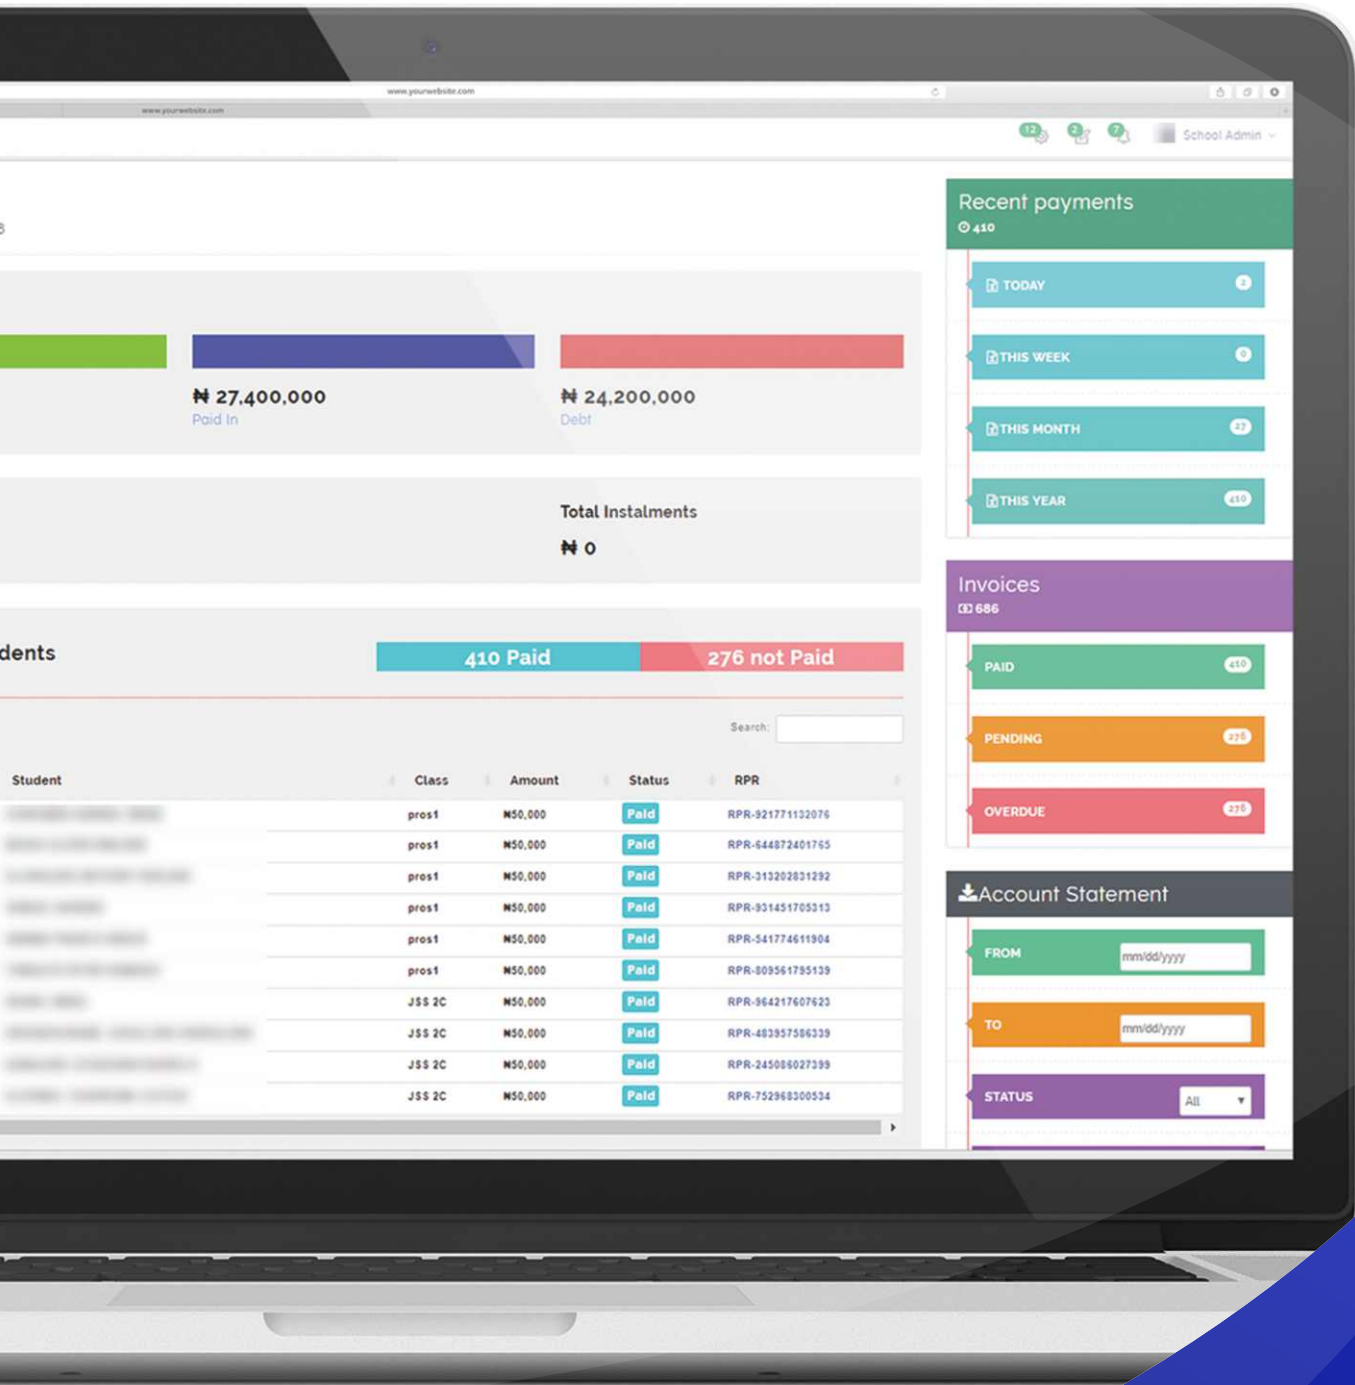

Convert your School website visitors into Parents

CASE STUDY OF LEKKI BRITISH SCHOOL Located in a serene part of the Lekki Peninsula Scheme 1, LBS holds popularity as a household name in Lagos state and Nationwide. LBS website has the most easy to use interface which ensures that web visitors are attended to in real time, giving out instant replies and feedback phone calls to all intending parents. This has increased their enquiry tremendously and their marketing team converted a good percentage to new parents.

Building an Ultra digital website for the school, educare makes it easier for parents of both active and prospective students to stay connected to the school through an intuitive website platform. This has ensured that Lekki British School among many other schools using educare ranks amongst the top schools in any profiling on the internet. We work out our partner schools to get quick optimization on Google search engine.

A close-up of a computer keyboard with a blue key that says "CONVERSION RATE OPTIMIZATION". The key is positioned in the center of the frame, with other keys like "End" and "←" visible around it. The background is dark, and the lighting highlights the texture of the keys.

Finance Management

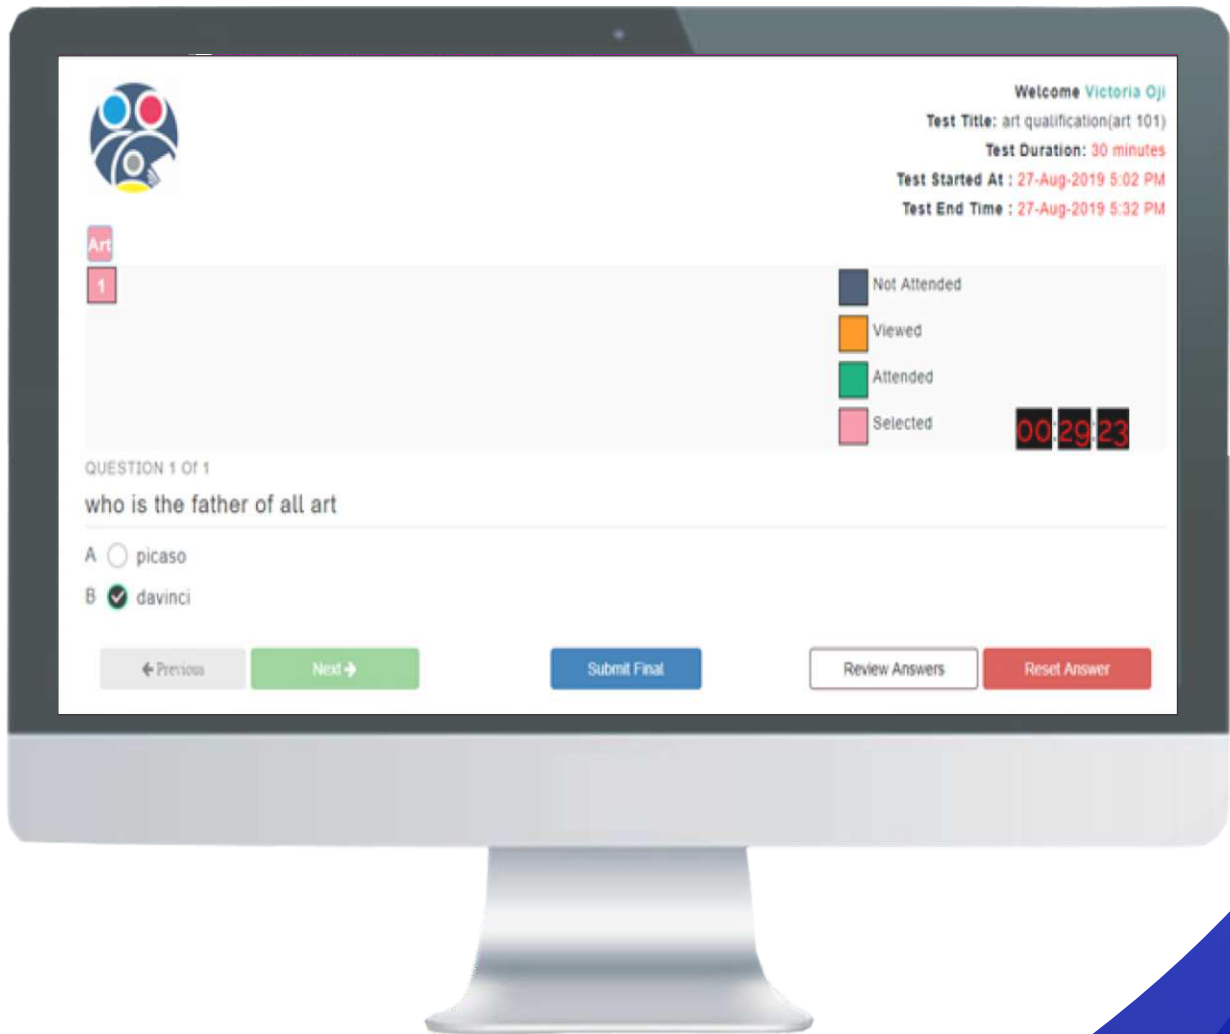

Track your every Kobo

When it comes to keeping track of your school's income, you need to be sure you're using a secure and efficient system. educare incorporates all types of fee structures followed by different institutions worldwide. educare Finance is our new school finance solution to streamline financial management across an academy or multi-academy trust, providing them with a complete and consolidated picture of their finances.

Catholic Mission Schools, Lagos reported a challenge in ensuring effective and appropriate systems of financial control across its 10 mission schools. With the schools positioned far apart; visiting in person to check the records of each became a tedious routine for management. “We don’t have a central finance team so we were looking at how this information could easily be consolidated online.” confessed the worried administrators.

Today, the story is changed. educare Finance management has been implemented in at least 3 of the 10 schools in the Diocese so far. Our system enabled an overview and a detailed analysis of expenditures and incomes across all schools, at the touch of a button. Ensuring value for money. Payment and Billings have become so transparent and flexible.

PREMIUM COMPUTER BASED TESTING (CBT)

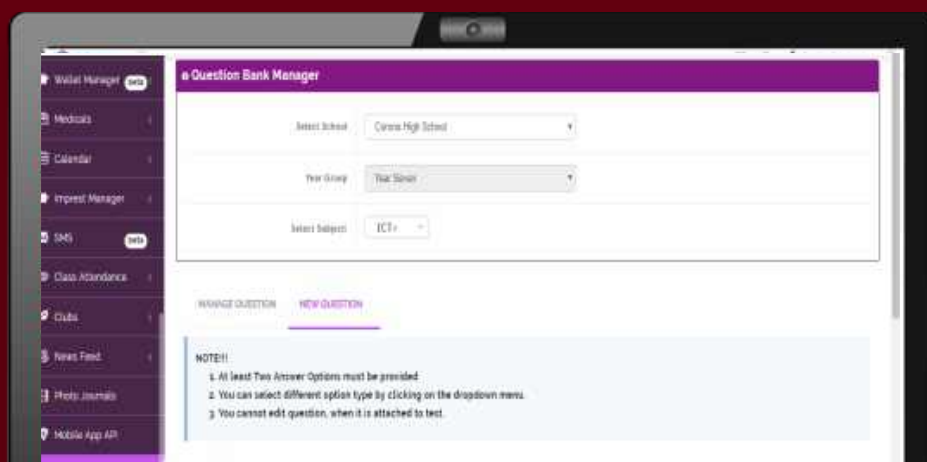

Computer Based Testing

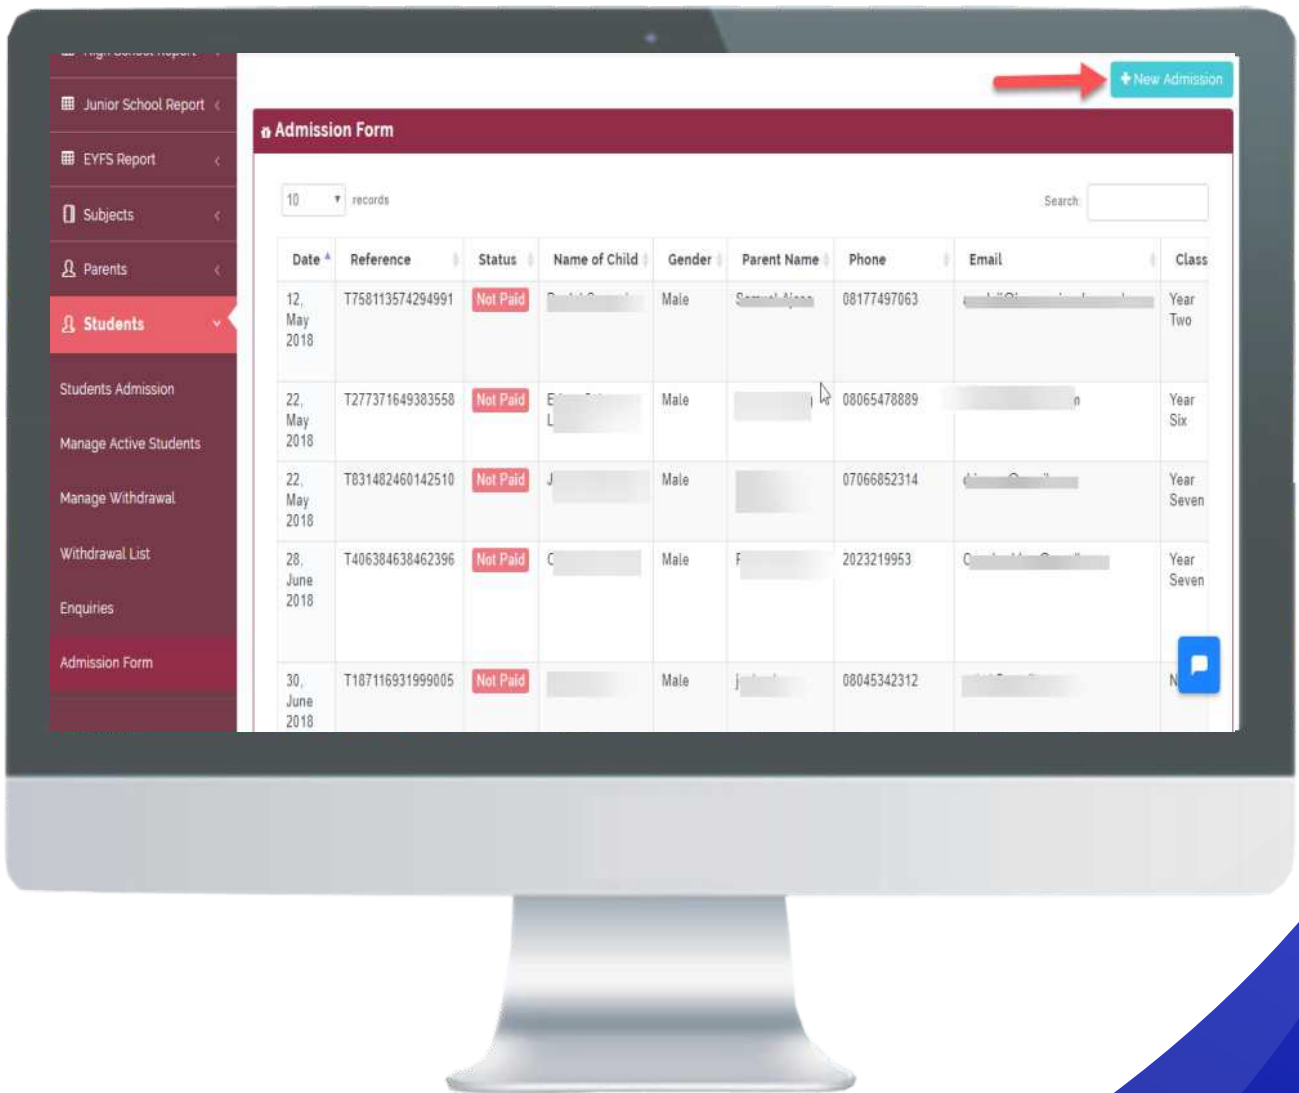

educare CBT goes beyond mere online testing. The in-depth analyses of test performances amazes both parents and schools alike. Our technology not only allows teachers to prepare practical exercises in a productive manner, it also gives room for specific assessment of the students all-round performances.

At Mater Ecclesiae College, teachers and parents know every child's performance ratio per topic. From the analysis of last term's result for years 8 & 9, the school's Vice Principal Academics has directed the English teacher to channel more emphasis to vocabulary development. Such as indicated from the test results, 45% of students score below grade B as a result of their repeated poor performance in that particular topic.

Furthermore, our automation makes it simple for teachers to keep records up to date more easily and accurately. They can tell, not only whether the student got a question right, but also how much time was spent on a given question. These assessments give teachers a much clearer picture as to their students' advancement. From there, they can intervene in a more timely, effective manner.

They may also be able to analyze trends across the class, and more easily compare test results with other classrooms and schools.

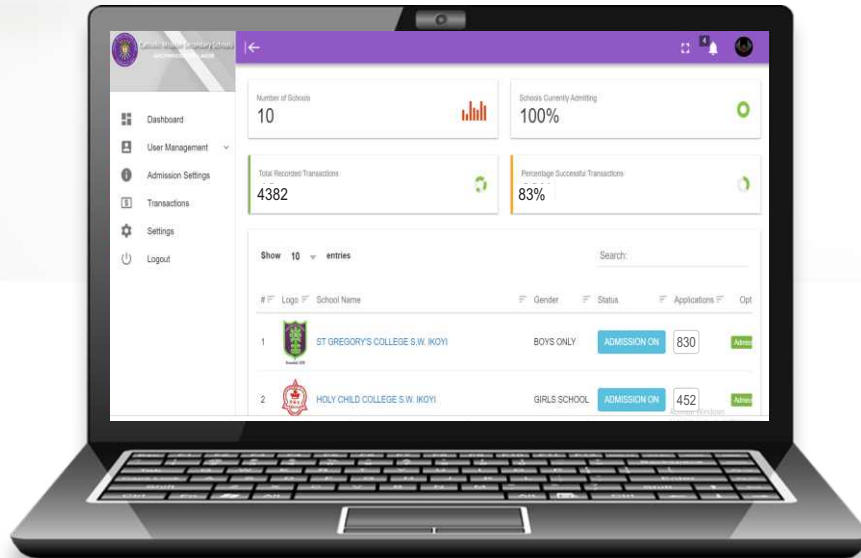

ADMISSION MANAGEMENT

Now you can admit PROSPECTIVES from any part of the world quicker

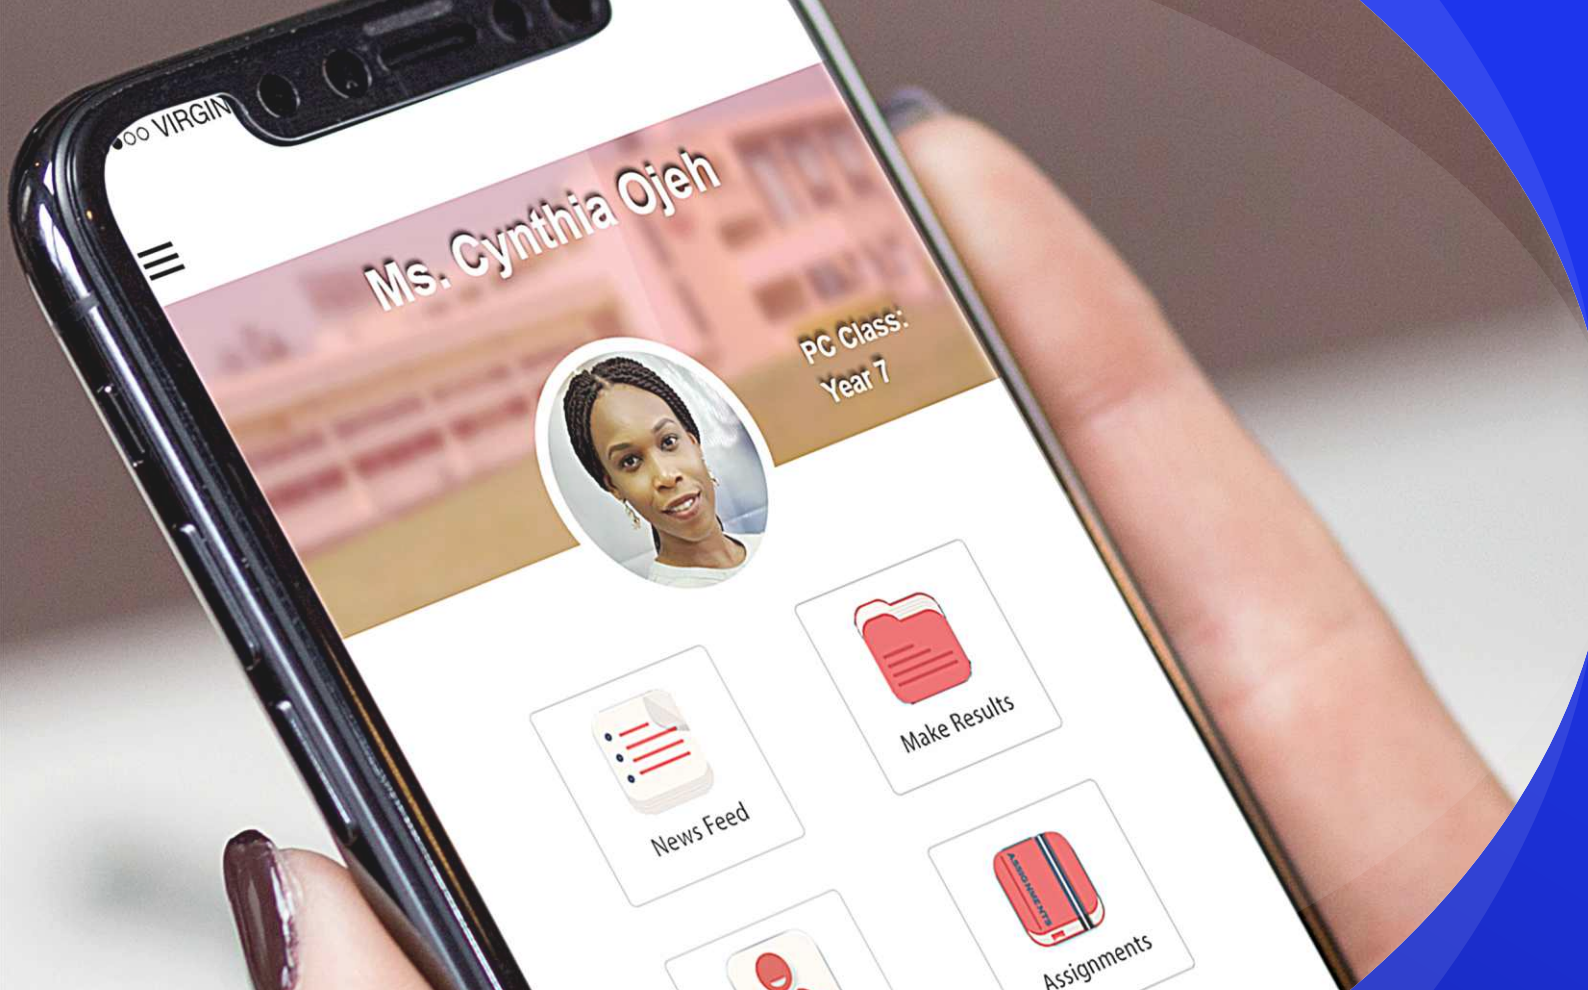

St. Gregory's College, Ikoyi has always been a legacy institution in the heart of Ikoyi, Lagos State.

The pedigree of graduates produced by the school keeps increasing every year. Before educare became their principal technology partner, prospective parents had to visit the school to view their serene and ambient campus located in Ikoyi, Lagos State.

Prospective students from other countries equally had to travel to Nigeria before partaking in any entrance exam. educare admission management module made it convenient and seamless for prospective parents to successfully inspect the school campus via their intuitive website, make necessary payments through their portal and write entrance examination using the CBT module... without stepping a foot on campus.

Mobile App

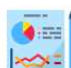

Lekki British School, a mixed school in Lagos Island with about 400 students population and ranking among the best in Lagos insists that educare MobileApp is core in their culture of maintaining close parental links; and great emphasis is placed on keeping parents informed of how their child/ward fares at school.

Since 2015, the school has enjoyed the educare platform. Keeping parents abreast of school developments is just one among many benefits the school finds so adorable in educare. The educare Parent App furnishes parents with the bill statement, timetable, homework details or achievement, attendance and behaviour information.

Henry Okafor, IT Manager at Lekki British School admitted that “Busy parents increasingly want access to live information about their children at every time and place that is convenient to them, which is usually on their phone or tablet.”

Our Partners

**Plus
hundreds
more.**

educare is a School Management Software driven by the same passion as educators.

It caters to K12 schools by automating their academic and administrative processes. Every day we make our platform, customer service, communications, and process better.

Our software is never "done," as we will keep further refining and developing. We will never stop pushing to better serve and communicate with our clients.

As an organization, we celebrate finding ways to get better and implementing those improvements.

A glowing lightbulb is held in a hand. The lightbulb is illuminated from within, creating a bright glow and a lens flare effect. The text "WE TURN YOUR IDEAS INTO REALITY" is written in a curved path above the lightbulb.
