

## Handles all your devices

Impero Education Pro is compatible with all major operating systems, allowing multiple different devices to be monitored and managed from a single view. It's compatible with Windows, Mac, Chrome, iOS and now Android all in one interface, so schools can support transformational learning through a mixed platform digital learning environment.

## Focus learning

With real-time visibility of every student's screen, and empowered by a range of classroom control, instructional and monitoring tools, teachers have visibility of what their students are accessing, viewing, or creating online.

## Benefits in using Education Pro

Remove online distractions

Encourage collaboration

Protect students online from harmful content or misinformation

Keep students focused and engaged

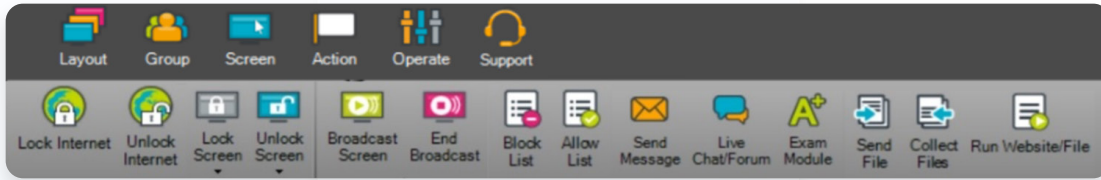

Save time

Remotely supports students

# Icons and Functionalities of EducationPro

Focus every student to the content you share directly on their device. Support building confidence for students, sharing their screen to the rest of the student devices.

Annotate students screen and show remote cursor to guide students with what you do on their device.

Saved time by launching applications on student devices remotely on 1:1 or mass basis.

EducationPro allows you to block applications on Windows. See everything your students see on their computers to guide and support them.

Log on and off devices in the class remotely to save time.

Focus student's attention by locking their screens.

Guide and focus students on a 1:1 or mass basis by turning their internet off.

Easily select which websites students can or cannot visit for a specific lesson.

See any student's screen in real time on 1:1 or mass basis.

Remotely shut down, start or restart devices on 1:1 or mass basis.

Take control of any device remotely to guide or instruct students.

Chat on 1:1 basis or with the whole class.

Send, open and collect files on 1:1 basis or for the whole class.

Design and send out exams on 1:1 basis or for the whole class. Run a report to analyse and collect results.

Create quick questionnaires to evaluate what students have learnt in the lesson or to open the lesson.
