TEACHER CERTIFICATION & TEACHER DEVELOPMENT PROGRAMS

We're on a mission to ensure that every child experiences the power of a great teacher. As part of that effort, we are proud to offer options for teacher certification and teacher development for your educators.

Our programs maintain high-quality standards that ensure our teachers are prepared for the classroom, confident in their abilities, and possess the unique insights, empathy, and skills to support students in Special Education - because our most vulnerable students deserve excellent teachers who will help prepare them for a bright future.

Teacher Certification Program:

With our Teacher Certification Program (TCP) you can certify unlicensed teachers in your schools, or create a Grow Your Own Program that will help build your teacher pipeline. TCP allows unlicensed and aspiring educators to become fully certified to teach for a fraction of the time and cost compared to traditional programs.

Teacher Development Program:

With our Teacher Development Program (TDP) you can upskill your teachers through modern, 21st-century, American teaching standards. This entirely asynchronous online professional development program is a perfect way for educators to develop their practice of teaching without getting fully certified.

TEACHER CERTIFICATION RECIPROCITY

Wondering about teaching in another state, online, or abroad?

Teacher Certification Reciprocity, or Teaching Credential Reciprocity, is an agreement between states that allows individual states to recognize each other's different teaching credentials. It determines which states your state-issued teaching certificate is transferable to.

TCP is proud to offer a licensure program that holds reciprocity with 47/50 states in America. This means that upon successful completion of TCP you can transfer your teaching license to another state, or use it to teach online or abroad.

This certification opportunity can be done online and remotely and offers a complete pathway to becoming a licensed teacher. Our unique program allows candidates to earn a sought-after American teaching license from anywhere in the world.

Our goal is to prepare globally competent teachers for a world in which they're needed, through the delivery of our contemporary curriculum centered on practical, research-based pedagogy in a state-of-the-art blended platform.

- Rene Frey, President & Co-founder

**In order to complete TCP from abroad, your clinical placement must be completed at an internationally accredited school that follows a U.S. curriculum.*
